Linux

[$] 25 years of Buildroot

Source: LWN.net

> Buildroot maintainer Peter Korsgaard gave a presentation about the long history of the build tool for embedded Linux systems at the 2026 Embedded Linux Conference Europe . In it, he covered more than just the past 25 years, looking at the current status of the project as well as what to expect in Bu...

Announcing XRAID: declustered parity RAID for zoned XFS

Source: LWN.net

> Christoph Hellwig has announced the initial public release of XRAID—declustered parity RAID that is integrated into XFS. The two primary aims of XRAID are to support parity RAID on zoned devices like SMR hard drives, and to provide a fast RAID implementation without inherent data integrity problems....

Security updates for Friday

Source: LWN.net

> Security updates have been issued by AlmaLinux (.NET 10.0, .NET 8.0, .NET 9.0, firefox, gcc, grafana, grafana-pcp, gstreamer1, gstreamer1-plugins-base, java-1.8.0-openjdk, kernel, kernel-rt, libimobiledevice, mingw-libpng, nginx:1.24, nodejs:22, nodejs:24, perl-CGI, perl-DBI, qt5-qtbase, tigervnc, v...

We came. We connected. We are Red Hat.

Source: Red Hat Blog

> When I joined Red Hat 27 years ago, we shipped Linux in boxes to retailers. A lot has changed since then. We've grown, evolved, and helped shape an industry that never stands still. But through it all, one thing has remained constant: the people who make Red Hat what it is. The way we show up for ea...

Node management in Red Hat OpenShift 5: Server-level visibility for bare metal

Source: Red Hat Blog

> Moving from vSphere to bare-metal Red Hat OpenShiftRed Hat OpenShift has supported bare metal from the start. But for much of its history, most deployments

> ran on top of an existing virtualization layer like VMware vSphere or Nutanix. That’s shifting. As more organizations adopt Red Hat OpenShift Vi...

Introducing Red Hat cloud extensions: Sovereign AI clouds on your own infrastructure

Source: Red Hat Blog

> If you've spent the last year provisioning AI and infrastructure capacity for tenants who can't use a public cloud, you've felt this firsthand: the hardware is local, but the operational model still isn't. Keeping data on local soil is only the first step. True digital sovereignty demands hard multi...

The SSH Bug That Made ANY 300-Character Password Valid

Source: Mental Outlaw

> In this video I discuss the sshole vulnerability (CVE-2026-123158) and how changes to Alpine Linux and OpenSSH that were made over the years created the perfect conditions for this bug that allowed hackers to bypass SSH authentication with 256+ bytes of garbage. My merch is available at https://base...

PostgreSQL Patches 52 Flaws, Including 22-Year-Old Bug Enabling Authenticated RCE

Source: The Hacker News

> A type confusion flaw in PostgreSQL lets a database user who can create objects run code on the server. Updates released yesterday fix it, along with 51 other security flaws. Full protection from this flaw also requires rebuilding any C-language extensions installed on the server. The flaw, tracked...

New Mior and Skyfall Attacks Let Rogue Cloud Hosts Steal Secrets From AMD SEV-SNP VMs

Source: The Hacker News

> Two attacks made public this week allow a malicious host to read data inside AMD SEV-SNP-protected virtual machines (VMs), which are built to keep the server's operator out. One of them, Mior, can also modify a VM's memory and fake the signed report confirming which software it runs. Both need contr...

FBI Says North Korean Hackers Stole Over $400 Million in Crypto Using Deepfake Video Calls

Source: The Hacker News

> The U.S. Federal Bureau of Investigation (FBI) has established that threat actors tied to the Democratic People's Republic of Korea (DPRK aka North Korea) have stolen more than $400 million worth of cryptocurrency as part of a social engineering scheme codenamed FaceStealer in the last 18 months. As...

Trezor Confirms Hidden Implants in CryptoBilis-Sold Wallets That Can Steal Recovery Phrases

Source: The Hacker News

> Three Trezor Safe 5 wallets bought from the reseller CryptoBilis contain an implant, an extra circuit board that can copy their recovery phrases, hardware wallet maker Trezor said yesterday. The implant reads the phrase from the wallet's screen and sends it over the mobile network to a server contro...
