### Forgejo 16.0.4 and 15.0.8 address critical security vulnerability

Source: *LWN.net*

The Forgejo software-forge project has announced the release of versions 16.0.4 and 15.0.8 , which fixes two security vulnerabilities. One is a critical flaw that would allow remote-code execution (RCE): When generating a new repository from a template repository, Forgejo clones the template reposit...

### [\$] PostgreSQL 19's "scary patch contest"

Source: *LWN.net*

PostgreSQL 19 was expected to be released in September, in keeping with the database project's longstanding tradition of a major release every year. However, some late-breaking concerns about several of the features slated for inclusion has some developers worried about the quality of the release. O...

### Julia 1.13 released

Source: *LWN.net*

Version 1.13 of the Julia programming language has been released. Highlights include faster precompilation of packages, improvements to Julia's REPL, and Juliaup , a graphical interface for the Julia version manager. A full list of changes can be found in the release notes . LWN covered Julia 1.12 i...

### Security updates for Thursday

Source: *LWN.net*

Security updates have been issued by AlmaLinux (389-ds-base, ansible-core, buildah, expat, glib2, gpsd, gpsd-minimal, gzip, kernel, kernel-rt, opentelemetry-collector, osbuild-composer, perl-DBI, python-lxml, python3.12-lxml, qt5-qtbase, thunderbird, valkey, vim, and xz), Debian (pyasn1), Fedora (da...

### Friday Five — September 11, 2026

Source: *Red Hat Blog*

Red Hat Positioned as a Leader in the 2026 Gartner® Magic Quadrant™ for Container ManagementRed Hat is recognized as a Leader in the 2026 Gartner® Magic Quadrant™ for Container Management. In Red Hat's opinion, this

recognition reinforces OpenShift's ability to manage containers, VMs and AI workload...

## Insights-client updates standardize RHEL package management

Source: Red Hat Blog

If you manage Red Hat Enterprise Linux (RHEL) systems connected to Red Hat Lightspeed, you're likely familiar with insights-client, the tool responsible for reading system information and reporting it to Red Hat Lightspeed's hosted services. Starting with RHEL 9.8 and RHEL 10.2, Red Hat is changing h...

## Closing the loop: From network policy intent to verified reality

Source: Red Hat Blog

Part 3 of a series on implementing zero trust security in Red Hat OpenShift with the layered zero trust validated pattern. Kubernetes NetworkPolicies are one of the most powerful—and most misunderstood—security primitives available to platform engineers. They declare intent: "This pod should only acc...

## Build a compliance assistant with AutoRAG and Red Hat OpenShift AI

Source: Red Hat Blog

If you run AI platforms for a bank, an insurer, or anyone else living under a stack of regulations, you already know the use case everyone asks for first: let our compliance and risk teams ask questions against our own policy documents and get an answer they can trust, with a citation they can check...

## When Home Security Gets Hijacked

## Attackers Chain JFrog Artifactory Flaws to Gain Admin Control and Plant Backdoors

Source: The Hacker News

Attackers have chained two flaws in JFrog Artifactory, the repository that software build pipelines pull from, to take administrator control of self-hosted servers and

plant backdoors, cloud security company Wiz said in a report. Wiz saw the attacks between August 15 and September 8. JFrog had fixed...

## **China-Linked UNC3569 Exploited Sogou Input Method Flaw to Deploy GRAYRABBIT Backdoor**

*Source: The Hacker News*

A China-linked hacking group exploited a flaw in Sogou Input Method, one of the most widely used tools for typing Chinese characters on Windows, to install a backdoor on victims' computers, security company Gen Digital said in research published Thursday. The attack started with a crafted link and e...

## **PaperCut Replaces Emergency Patches With Fixes for Two Actively Exploited Flaws**

*Source: The Hacker News*

PaperCut on Thursday released a new security maintenance release that replaces all previously published emergency patches that were pushed to address two security flaws that have come under active exploitation. The software development company said PaperCut NG/MF versions 26.0.5, 25.0.13 and 24.1.10...

## **Cisco FMC Flaws Exploited to Steal Credentials and Deploy Qilin Ransomware**

*Source: The Hacker News*

Cisco has revealed that three distinct threat clusters linked to ransomware and state-sponsored attacks have been exploiting two recently patched Secure Firewall Management Center (FMC) vulnerabilities. The attacks leverage CVE-2026-20079 (CVSS score: 10.0), an authentication bypass vulnerability in...

## **ThreatsDay: 200 Android Flaws, Browser-Built Phishing, 119K Scam Shops + 23 More Stories**

*Source: The Hacker News*

A lot of this week's security news has the same awkward answer to one question: "Why was that allowed to work?" An extension asks for access and takes too much. A trusted service becomes part of a phishing chain. An old bug still gets results. An exposed system stays exposed. A package looks useful...

## **Google Play Early Access Abused to Push Thousands of Deceptive Android Apps**

*Source: The Hacker News*

Bad actors are misusing Google Play's Early Access program to push deceptive apps that claim to offer money, rewards, casino winnings, and premium content. Early Access apps are apps that haven't been released on the official Android app marketplace. The main idea behind the program is for developer...

## **Check Point Discloses Two 9.8-Rated VPN Certificate Flaws Enabling Unauthenticated RCE**

*Source: The Hacker News*

Check Point has patched two critical vulnerabilities in the way its firewall and management products handle VPN certificates. The company says both could allow an unauthenticated remote attacker to run code, but only "under specific conditions" that it has not described. One flaw affects Check Point...

## **PaperCut Attacker Uses Hundreds of AI Agents to Compromise 440+ Instances**

*Source: The Hacker News*

A suspected Russian-speaking cyber actor has been attributed to the use of artificial intelligence (AI) to devise exploits targeting a recently disclosed pair of security flaws in PaperCut NG/MF and break into hundreds of instances. According to independent reports from Blackpoint Cyber and GreyNoise...

## **Gigabud Creates Android Work Profiles to Hide From Banking App Malware Checks**

*Source: The Hacker News*

The Gigabud banking trojan now installs a second Android app that creates a work profile on an infected phone and drops a tampered banking app inside it, security firm Group-IB said in a report published on September 9. A work profile is a separate space that Android typically reserves for employer...

## **CISA Flags Exploited Cisco, Citrix, Fortinet Flaws, Sets Sept. 12 Federal Patch Deadline**

*Source: The Hacker News*

The U.S. Cybersecurity and Infrastructure Security Agency (CISA) on Wednesday added three flaws, each impacting Cisco, Citrix, and Fortinet, to its Known Exploited Vulnerabilities (KEV) catalog, requiring Federal Civilian Executive Branch (FCEB) agencies to apply the patches by September 12, 2026. T...
