[\$] CERN's migration path from CentOS Linux to Debian

Source: *LWN.net*

The European Laboratory for Particle Physics, usually just called CERN , is not only the birthplace of the World Wide Web , it is home to the Large Hadron Collider (LHC), the world's largest and highest-energy particle accelerator . As such, its computing environment is both truly unique and of grea...

Three stable kernels for Monday

Source: *LWN.net*

Greg Kroah-Hartman has announced the release of the 7.2.4 , 6.18.50 , and 6.12.109 stable kernels. Each contains important fixes throughout the tree. Users are advised to upgrade.

[\$] Fixing the TCMalloc regression with RSEQ operations

Source: *LWN.net*

The restartable sequences feature is one of the stranger corners of the kernel's user-space interface; it provides a way for user space to carry out simple lockless operations and be informed if it is preempted over the course of an operation (and must, thus, restart). Work merged in the 6.19 releas...

Buildroot 2026.08 released

Source: *LWN.net*

Version 2026.08 of the Buildroot embedded Linux system builder has been released. Buildroot 2026.08 includes nearly 1,000 changes from 100 contributors; some of the notable changes include support for Linux 7.1.x, Binutils 2.46.1, GCC 16.2.0, glibc 2.44, as well as adding the M68K and IBM Power 10/1...

Security updates for Monday

Source: *LWN.net*

Security updates have been issued by AlmaLinux (buildah, freerdp, gegl04, go-fdo-client, grafana, grafana-pcp, kernel, and pipewire), Debian (aom, chromium, libde265, libssh2, thunderbird, and tryton-server), Fedora (chromium, composer, cosmic-greeter, gegl04, greetd, ibus-table, jss, libheif, light...

Asahi Linux now supports M3-series Macs

Source: *LWN.net*

The Asahi Linux project has announced that support for Apple's M3-series chips has been added to the Asahi installer. Linux support for M3 series SoCs and the machines powered by them is now in a state where almost everything supported on the M1 and M2 series machines just works. This includes the w...

Why faster coding isn't making delivery any faster

Source: *Red Hat Blog*

Generative AI promised to eliminate one of the biggest sources of friction in software engineering: Writing code. In many ways, it has delivered. Today, an AI coding agent can implement features in minutes that might have taken an engineer an hour. It can generate tests, refactor code, write documen...

Introducing the external secrets management console plug-in

Source: *Red Hat Blog*

Red Hat recently released the initial version of the external secrets management console plug-in. It's an extension of the Red Hat OpenShift web console, which lets you inspect any of the resources deployed by Red Hat's portfolio of secrets management operators: cert-manager operator for Red Hat Ope...

Grindr to Pay £26 Million to Settle U.K. Claims Over HIV Status Data Sharing

Source: *The Hacker News*

Online dating app Grindr has opted to pay £26 million (\$35.1 million) to settle a lawsuit in the U.K. over allegations that it shared users' personal information, including their HIV status, with third-parties. Grindr, which is the largest LGBTQ+ dating app, was sued in April 2024, accusing it of vi...

PEEP Turns Chrome and Edge Into Post-Compromise Backdoors for Host Command Execution

Source: *The Hacker News*

Cybersecurity researchers have disclosed details of a complex Chromium-based post-exploitation toolkit called PEEP that masquerades as a bookmarks extension for the web browser. "Requiring prior administrative or code execution access, its installer injects the extension directly into Chrome/Edge pr...

Fake IT Calls Target Executives in Microsoft 365 Data Theft and Extortion Attacks

Source: The Hacker News

Threat hunters have disclosed details of a widespread data theft and extortion threat cluster that's targeting Microsoft 365 and other software-as-a-service (SaaS) offerings through information technology (IT) help desk vishing, adversary-in-the-middle (AitM) token theft, and residential-proxy sign-...

Weekly Recap: Chrome 0-Day, Router Hijacks, Coder Supply Chain Attack and More

Source: The Hacker News

Turning off email images should at least stop the pictures. This week, attackers had a workaround: a scannable QR code built out of text. It still appears, even with images blocked. A small detail, but an annoying one if that was a precaution you were counting on. Elsewhere, a trusted software sourc...

Your Cloud Security Checklist Doesn't Work the Way You Think It Does

Source: The Hacker News

If managing security across multiple cloud providers wasn't hard enough, each one fails in a different way. For the 2026 Cloud Security Index, Intruder analyzed misconfiguration data from 3,000 organizations across AWS, Azure, and Google Cloud and found that risk profiles across providers have almos...

Rogue ScreenConnect Clients Spread Four-Stage VBScript Chain to Newly Connected Hosts

Source: The Hacker News

Cybersecurity researchers have disclosed details of worm-like activity that abuses ConnectWise ScreenConnect to distribute a malicious Visual Basic Script (VBScript) payload to newly connected systems. According to Huntress, three unrelated incidents have been found to use diverse initial access met...

Telerik UI Padding-Oracle Bug Chained to Unauthenticated RCE — Public Exploit Released

Source: The Hacker News

A TantoSec proof-of-concept turns an AES-CBC "padding oracle" in Telerik UI for ASP.NET AJAX into unauthenticated remote code execution — but only against applications in a specific non-default configuration, and Progress patched the chain in July. There are no confirmed reports of exploitation in t...
