Asahi Linux 7.3 progress report

Source: LWN.net

> The Asahi Linux developers have put out a new report on their progress toward a Linux distribution for Apple devices. Some time ago, we were made aware of multiple attempts to exploit our permissive licensing to hijack our work, with a direct view to replacing the project and aggressively monetising...

Amutable Foundations: A Technical Overview

Source: LWN.net

> Lennart Poettering, Michael Vogt, and Joaquim Rocha have put together a detailed overview of what the Amutable Operating System (AOS) and associated infrastructure will look like. The image-based OS approach enables us to enforce some very strict but powerful security properties, which elevate the s...

Source: LWN.net

> Videos from the 2026 X.Org Developers Conference (XDC) are now available on YouTube . XDC was held in Toronto, Ontario, Canada September 28-30.

[$] Locking down hibernation for the winter

Source: LWN.net

> When a computer hibernates, the kernel writes the contents of memory to disk and then shuts the system down. Resuming from hibernation involves reading that data back into memory, and then having the kernel pick up where it left off. Unfortunately, the kernel does not have any way to know that the d...

Seven stable kernels with fixes for three Xen vulnerabilities

Source: LWN.net

> Hot on the heels of the previous two stable kernels , Greg Kroah-Hartman has announced the release of the 7.3.3 , 6.18.62 , 6.12.116 , 6.6.162 , 6.1.192 , 5.15.225 , and 5.10.274 stable kernels. Each one only contains fixes for three use-after-free vulnerabilities announced today by the Xen security...

Two stable kernels for Friday

Source: LWN.net

> Greg Kroah-Hartman has released the 7.3.2 and 6.18.61 stable kernels. Each contains quite a few changes throughout the tree; users are advised to upgrade.

Security updates for Friday

Source: LWN.net

> Security updates have been issued by AlmaLinux (cockpit-files, container-tools:rhel8, delve, gcc-toolset-12-binutils, gimp:2.8, glibc, go-toolset:rhel8, kernel, libfastjson, mariadb:10.3, mod_auth_openidc:2.3, mysql:8.0, php:8.0, pki-core:10.6 and pki-deps:10.6, squid:4, tang, tesseract, thunderbird...

5-minute demo: How to manage applications at scale with Red Hat OpenShift

Source: Red Hat Blog

> Operating cloud-native applications at enterprise scale is rarely a single-cluster affair. As businesses continue to expand across public cloud providers, private datacenters, and edge locations, platform and security teams run into a common operational issue sprawl. Managing application lifecycles,...

Progress Report: Linux 7.3

Source: Asahi Linux Blog

> Well here we are again. Linux 7.3 is out and it’s been an eventful few months, so let’s get stuck in to another Asahi Linux progress report! Upstreaming continues As always, upstreaming work continues to progress. Aside from the usual patches for low-level SoC blocks, two major drivers made it on to...

M2: Episode 1 (or, Asahi Linux on M3)

Source: Asahi Linux Blog

> It’s been a while since we did a blog post outside of the progress reports, and today’s as good an occasion for one as any; support for M3 series machines has now been merged into the installer. In other words, Asahi Linux now officially supports Macs with an M3 series SoC! Linux support for M3 seri...

Claude Code's “Don't Ask Again” File Exposes Passwords and Keys in 1,122 Public Copies on GitHub

Source: The Hacker News

> Passwords and API keys that developers typed into commands they approved in Claude Code are sitting in public GitHub repositories, where anyone can read them. When a user selects "Yes, and don't ask again," Anthropic's AI coding assistant can save the command, word-for-word, including the secret, in...

Installing the Fix for an Exploited WordPress Flaw Can Expose Some Sites One Last Time

Source: The Hacker News

> Some WordPress sites can still be attacked while they install the fix for an actively exploited flaw, according to Umut Bayram, the Picus Security researcher who found it. The update that installs the fix still unpacks its files using the site's old, unpatched code, so an attacker who strikes at the...

Hackers Target OpenSSH SSHole Flaw Within Hours of Disclosure, Gain Root on Honeypot

Source: The Hacker News

> Threat actors are attempting to exploit a recently disclosed security flaw impacting OpenSSH that can enable sign-ins to accounts that have no password set, according to Previdian. The vulnerability, tracked as CVE-2026-123158 (CVSS score: 8.1) and codenamed SSHole (or *sshole), impacts Linux system...

OpenAI Launches GPT-6 Cyber After AI Helps Find 81 Firefox Flaws, 948 Linux Exploits

Source: The Hacker News

> OpenAI on Thursday unveiled GPT-6 Cyber, which it described as a major step forward in security research that brings together stronger cybersecurity capabilities with a step-change improvement in model alignment. The new model is "more capable at finding and fixing vulnerabilities, and far more reli...

Microsoft Paint RCE Fix Now Available, but Windows Update Won't Deliver It

Source: The Hacker News

> A fix for CVE-2026-83844, a remote code execution flaw in Windows Paint, is now in the Microsoft Store. Paint gets this fix only through a Store update, not through

> Windows updates. The fixed build, 11.2609.401.0, was the newest Paint build in all ten countries The Hacker News checked today. The fla...

Malicious Browser Extensions Could Use Claude Dispatch to Run Code on Users' Computers

Source: The Hacker News

> A browser extension that can run scripts on claude.ai could make Claude Desktop run code on a person's computer, researchers at Forever Security, an endpoint security company, showed in a test. The attack needs Dispatch, a Claude feature that lets people send tasks from their phone to Claude Desktop...
