Linux

Python 3.15 released

Source: *LWN.net*

Version 3.15 of the Python programming language has been released. Notable changes in this release include the addition of the sentinel and frozendict built-in types, the use of UTF-8 encoding by default, package start-up configuration files , as well as improvements in the experimental JIT compiler...

[\$] Adding kernel control-flow-integrity checking to GCC

Source: *LWN.net*

While many developers are struggling to keep up with the flood of vulnerability reports, others are still focused on preventing those reports from happening in the first place. Control-flow integrity (CFI) is the term for preventing (or at least detecting) exploits that divert the flow of control fr...

[\$] The state of systemd: 2026 edition

Source: *LWN.net*

At the 2026 All Systems Go! conference, systemd maintainers Luca Boccassi and Zbigniew Jędrzejewski-Szmek delivered the traditional "state of the project" session with an overview of the systemd project's accomplishments in the past year. That was followed by a maintainer round table where Boccassi,...

Let's Encrypt moving to 64-day certificate lifetimes in 2027

Source: *LWN.net*

Let's Encrypt , the nonprofit that provides free TLS certificates for millions of sites, has announced that it will be moving to certificates with 64-day lifetimes on February 10, 2027: This means that any certificate we issue or renew on and after that date will have a 64 day validity period, and w...

Security updates for Friday

Source: *LWN.net*

Security updates have been issued by AlmaLinux (bind, bind9.16, freerdp, glibc, kbd, mod_auth_openidc, openssl, perl-DBI, python3.12, python3.14, and tftp),

Debian (rails and twitter-bootstrap3), Fedora (barman, cockpit, hcloud, libmodsecurity, nginx-mod-modsecurity, perl-DBI, sudo, and xorg-x11-ser...

From Livestream To Library: Publishing Flock To Fedora's Session Recordings

Source: Fedora Magazine

Intro After months of good old fashioned struggle with Google Drive and YouTube Studio, we were finally able to prepare the video sessions from the 2025 and 2026 Flock To Fedora event livestreams. These are now released to our YouTube and PeerTube communities. This article describes the details of t...

Why "secure by design" is the new standard for open source

Source: Red Hat Blog

Open source software faces significant regulatory shifts, making "secure by design" development practices increasingly important. The Cyber Resilience Act (CRA) takes effect on December 11, 2027, and as of September 11, 2026, the first CRA vulnerability and incident reporting obligations were live....

Scale enterprise analytics by running Cloudera Data Platform with OpenShift Virtualization

Source: Red Hat Blog

IT leaders face a frustrating dilemma when scaling big data: Should they force engineering teams to rewrite applications running on traditional virtual machines (VMs) for containers, or maintain separate, expensive infrastructure environments? Red Hat OpenShift lets organizations modernize VMs along...

Anthropic Cuts Live Internet Access for Internal AI Tests After Claude Exploits Injection Flaws

Source: The Hacker News

Anthropic on Friday said it's cutting off live internet access for all its internal evaluations following the discovery of new incidents in which its artificial intelligence (AI) models exhibited misaligned behavior and targeted real websites. The AI company said it identified four broad categories...

Credential-Stealing GitHub Actions Workflows Planted in Tens of Thousands of Repositories

Source: The Hacker News

Cybersecurity researchers have disclosed details of an ongoing credential-theft campaign that has compromised two high-profile open-source maintainer accounts to push a malicious workflow into over 340 repositories. "Using the account of Takashi Kitao, author of the 18,400-star game engine pyxel, th...

FBI Arrests Another ShinyHunters Suspect Reportedly Involved in Its Jobs Portal Hack

Source: The Hacker News

The FBI has arrested another suspected co-conspirator of ShinyHunters, FBI Director Kash Patel said on October 9 in a post on X. ShinyHunters is the extortion group that said in September it had breached the FBI's jobs portal and stolen sensitive data on almost all FBI agents and job applicants. The...

P7 DarkSword iOS Exploit Kit Adds Crypto Wallet Data Theft and Remote Commands

Source: The Hacker News

Cybersecurity researchers have disclosed details of a previously unseen variant of the DarkSword iOS exploit kit called P7 DarkSword. "Compared with the variants we usually observe, P7 reduces its on-device footprint, adds on-device keychain and crypto-wallet theft, and adds two way C2 communication...

TP-Link Sued by Four More U.S. States Over Router Security and China Ties

Source: The Hacker News

Four more U.S. states sued router maker TP-Link Systems on October 6, bringing the total to five, with Texas filing a suit in February. Florida, Iowa, Montana and Nebraska allege the California company misled buyers about how secure its routers are and how separate it is from China. TP-Link denies t...

Researchers Publish Working Exploit for Pre-Auth AnyDesk Linux Flaw That Gives Root Access

Source: The Hacker News

Security researchers have published a full working exploit for a pre-authentication remote code execution flaw in AnyDesk Linux that gives attackers root access before anyone approves the connection. AnyDesk patched the flaw in version 8.0.3 in June, but its changelog described the fix only as "fixe...

Anthropic Launches Free AI Vulnerability Scanner for Open-Source Projects

Source: The Hacker News

Anthropic on Thursday unveiled OSS Scanner as an opt-in vulnerability scanner to help secure the open-source ecosystem using artificial intelligence (AI). "It's an opt-in service informed by our experience using Claude to find vulnerabilities during Project Glasswing," Anthropic said. "Projects that...

Attackers Exploit AhsayCBS Flaws to Deploy XMRig Miners Disguised as Microsoft Edge

Source: The Hacker News

Threat actors have been observed exploiting two recently disclosed flaws in the AhsayCBS backup utility to seize control of affected devices and deploy web shells and XMRig cryptocurrency miners. Details of the flaws are below -
CVE-2026-105133 (CVSS v4 score: 5.5) - An improper authentication vulne...

Flax Typhoon Exploits Five Flaws as CISA Sets October 11 Deadline for Federal Agencies

Source: The Hacker News

The U.S. Cybersecurity and Infrastructure Security Agency (CISA) on Thursday added five security flaws to its Known Exploited Vulnerabilities (KEV) catalog, following their abuse by a China-linked threat actor known as Flax Typhoon. The vulnerabilities in question are listed below - CVE-2015-3306 (C...
