### Git v2.56.0 released

Source: *LWN.net*

Version 2.56 of the Git distributed version-control system has been released. It has 748 non-merge commits since Git 2.55 was released back in June; those commits came from 104 developers, 39 of whom are first-time contributors. New features include a safer workflow for conflict resolution, smaller...

### [\$] Reducing undefined behavior in the C language

Source: *LWN.net*

As a professor of biomedical engineering, Martin Uecker perhaps does not fit the profile of a typical presenter at Kernel Recipes . He is, however, a longtime Linux user, and works on free software for controlling magnetic resonance imaging (MRI) scanners. He was at the conference to talk about the...

### Security updates for Monday

Source: *LWN.net*

Security updates have been issued by AlmaLinux (firefox, ipa, kernel, libxml2, perl-DBI, python-cryptography, thunderbird, and unbound), Debian (chromium, evolution-data-server, exim4, ghostscript, incus, lemonldap-ng, libheif, nodejs, php8.4, ruby-obj, swift, and vlc), Fedora (chromium, cinnamon, ci...

### Dutch Police Arrest 24-Year-Old Amsterdam Man in ShinyHunters Investigation

Source: *The Hacker News*

Dutch authorities have confirmed that they arrested a 24-year-old man from Amsterdam in connection with the ShinyHunters group. "It is true that this month a 24-year-old man from Amsterdam was arrested in an investigation into the hacker group ShinyHunters," the Politie Landelijke Opsporing en Inter...

## **Official MCP Python SDK Flaw Can Let Malicious Servers Steal OAuth Credentials**

*Source: The Hacker News*

A malicious MCP server could trick an application built on the official MCP Python SDK into handing over the OAuth credentials it uses to log in to a real service, the SDK's maintainers said in a security advisory. Affected versions sent the client secret, the authorization code, and the PKCE proof...

## **OpenAI Shelves GPT-6.1 Astra After Tests Find Deception and Unauthorized Actions**

*Source: The Hacker News*

OpenAI on Monday shelved plans to release GPT-6.1 Astra, a next-generation artificial intelligence (AI) model that was planned for an October launch, after it failed internal safety and alignment audits. The development was first reported by The Wall Street Journal. The move "marks a rare case of a...

## **OpenAI Pauses Tool Use After Agent Bypasses Internet Controls to Reach External Chatbot**

*Source: The Hacker News*

OpenAI said it has made the decision to pause training of its most powerful models after one of its agents during reinforcement learning (RL) training contacted an external chatbot by exploiting a loophole in its internet-access restrictions. "An agent attempting to complete a search-based training...

## **Apple Patches CoreGraphics Flaw Possibly Exploited in Targeted Attacks**

*Source: The Hacker News*

Apple has released security updates to address a vulnerability in older versions of iOS, iPadOS, and macOS that it said may have been exploited in targeted attacks. The vulnerability, tracked as CVE-2026-86950, refers to an out-of-bounds write impacting the CoreGraphics component that could lead to...

## **Hackers Use NeedyMantis to Maintain Long-Term Access in Breached Networks**

*Source: The Hacker News*

Hackers have used a malware family called NeedyMantis to maintain long-term access to networks they had already breached, Microsoft said in a technical analysis. The malware has been seen in a small number of targeted intrusions at telecommunications organizations, universities, medical nonprofits,...

## **IAM for AI agents: A Practical Enterprise Framework**

*Source: The Hacker News*

What is IAM for AI agents? AI agents authenticate, invoke tools, and act across enterprise systems with delegated authority. IAM for AI Agents is the identity-control architecture that governs those actors. This guide covers the limits of conventional provisioning, the components that matter, how to...

## **Bitget Says Attacker Exploited Third-Party Security Product Flaw to Steal \$388M**

*Source: The Hacker News*

The attacker who stole about \$388 million from the cryptocurrency exchange Bitget gained access through a vulnerability in a third-party security product the exchange used, Bitget said on Monday. The attacker exploited the flaw to obtain high-level internal credentials and then, on September 24, use...

## **RatHat Android Malware Console Uses Gemini to Identify Higher-Value Victims**

*Source: The Hacker News*

RatHat's operators build and publish the Android banking trojan and control infected phones from a web console, according to security company Cleafy. Cleafy has traced nearly 100 deployments of that console since April 2026. It said this fits a malware-as-a-service model, in which each customer runs...

## **Weekly Recap: \$387M Crypto Hack, Citrix Exploits, AI Agents Go Off-Script, and More Threats**

*Source: The Hacker News*

A domain used as harmless placeholder text showed up in roughly 1,700 repositories. Then somebody registered it and started serving malicious lures. That is the kind of week this was: forgotten assumptions turning into live attack surface. Elsewhere, weak service accounts, old bugs, exposed systems,...

## **Webinar: How to Govern AI Agents, Reduce Excessive Access, and Control Shadow AI**

*Source: The Hacker News*

AI agents are moving into production faster than security teams can govern them. They are connecting to apps, handling data, calling APIs, and acting across business systems—often without the same controls applied to human users. According to Okta's Global CISO Insights 2026 report, only 47% of CISO...

## Carbonato Botnet Compromises Docker Hosts to Deploy Telegram-Controlled Hermes AI Agent

Source: *The Hacker News*

Cybersecurity researchers have disclosed details of a new botnet malware called Carbonato that's targeting exposed Docker daemons to deploy an open-source artificial intelligence (AI) agent framework called Hermes Agent. "The implant installs the framework unchanged, then overwrites its SOUL.md pers...
