[\$] How KDE got funding to add enterprise features

Source: *LWN.net*

The Sovereign Tech Agency (STA) is investing nearly €1.3 million in KDE through 2027. At Akademy 2026 in Graz, Austria, Nate Graham and Kevin Ottens, two of the contributors who helped bring in the investment, explained how the funding was secured, provided tips on how projects should approach organ...

Two stable kernels for Friday

Source: *LWN.net*

Greg Kroah-Hartman has announced the release of the 7.2.8 and 6.18.54 stable kernels. Each contains a number of important fixes throughout the tree; users are advised to upgrade.

A summary from the 2026 Git Contributors' Summit

Source: *LWN.net*

Johannes Schindelin has posted a detailed summary of the discussions held at the 2026 Git Contributors' Summit. Topics covered include Git 3.0, security process, documentation, the pluggable object database, use of LLMs, and more.

Security updates for Friday

Source: *LWN.net*

Security updates have been issued by AlmaLinux (kernel, kernel-rt, perl-DBI:1.641, and unbound), Debian (jq, libreoffice, openssl, and redis), Fedora (389-ds-base, bcm283x-firmware, cockpit, flatpak-builder, mingw-gdk-pixbuf, openssl3, pcs, rust-cryptoki, squid, uboot-tools, and webkitgtk), Mageia (...)

Red Hat Enterprise Linux 10 STIG automation now matches DISA STIG V1R2

Source: *Red Hat Blog*

For the U.S. Department of Defense (DoD) and its contractors, security has to hold up against a published baseline—not a general claim that systems are “secure.” The Defense Information Systems Agency (DISA) defines that baseline in Security Technical Implementation Guides (STIGs), and STIG complian...

How to manage aircraft leases with AI agents

Source: Red Hat Blog

AI quickstarts are a catalog of ready-to-run, industry-specific use cases for your Red Hat AI environment. Each aims to provide a simple and practical way to solve real-world problems using AI on enterprise open source infrastructure. This quickstart takes on a document problem most people outside o...

Compromised GitHub Actions Came Back Online and Resumed Executing Mini Shai-Hulud Malware

Source: The Hacker News

Two actions-cool GitHub Actions have been disabled for a second time after the repositories became accessible last week, months after they were compromised during the May 2026 Mini Shai-Hulud campaign. The affected GitHub Actions are listed below - actions-cool/issues-helper actions-cool/maintain-on...

PamStealer macOS Malware Adds Live C2 Payload Decryption and Multi-Layer Persistence

Source: The Hacker News

Cybersecurity researchers have flagged a new version of PamStealer that ensures that the main payload can only be recovered using a server-side decryption chain. The latest artifacts, per Jamf Threat Labs, continue to rely on the same JavaScript for Automation (JXA) dropper mechanism, but modify the...

The SOC Doesn't Need to Start Over with Every Alert

Source: The Hacker News

Security leaders keep debating whether AI will produce an entirely new class of cyberattack. The nearer change is quieter and already visible: AI has made a failed attack cheap to retry. The routine version looks like this. An attacker lands on a low-privilege cloud account, and the first try at pri...

Bitget Says Suspected North Korean Hackers Stole \$351.6M After Backend Compromise

Source: The Hacker News

Cryptocurrency exchange Bitget said suspected North Korean threat actors have stolen \$351.6 million from its hot and warm wallets. "At 18:31 UTC on September 24, 2026, Bitget's security systems identified unauthorized transfers involving a limited number of hot wallets," BitGet said in a post shared...

Roundcube Pre-Auth SQL Injection Flaw Actively Exploited in the Wild

Source: *The Hacker News*

The Canadian Centre for Cyber Security has warned that a now-patched Roundcube Webmail vulnerability is being actively exploited in the wild. The vulnerability in question is CVE-2026-48842 (CVSS score: 8.1), a pre-authentication SQL injection in the virtuser_query plugin of Roundcube Webmail versio...
