F-Droid 2.0: A new chapter for Android freedom

Source: [LWN.net](#)

The F-Droid project has announced the release of F-Droid 2.0, which is a complete redesign of the official app. Notable changes in the release include making it easier to discover and install applications, more useful app categories, improved search, and much more. For more than a decade, F-Droid ha...

Research into file-notification attacks on Linux

Source: [LWN.net](#)

Sudheendra Raghav Neela, a member of a group of researchers from Graz University of Technology , has announced the release of research into file-notification attacks that would allow spying on user activity on Android, Linux, macOS, and Windows. The group has published a paper with details on the re...

[\$] Listening to the radio with Rust

Source: [LWN.net](#)

Many of the transmissions sent over the radio spectrum can be decoded with a relatively cheap hardware dongle. Thomas Eckert presented at RustConf 2026 in Montreal about his hobby: decoding radio transmissions with Rust. In his presentation, he covered all of the math necessary to get started with s...

The Kernel Report 2026 edition

Source: [LWN.net](#)

After a two-year hiatus, LWN's Jonathan Corbet presented an updated edition of his Kernel Report at the Kernel Recipes conference. Corbet looked at what is happening in the kernel community, how it's dealing with a period of accelerated change, and where things might go in the future. Video of the t...

Security updates for Thursday

Source: [LWN.net](#)

Security updates have been issued by AlmaLinux (buildah, containernetworking-plugins, firefox, kernel, kernel-rt, openexr, perl-DBI, podman, postgresql,

postgresql16, postgresql:15, runc, skopeo, and tar), Debian (libdatettime-timezone-perl, tzdata, xdg-dbus-proxy, and znc), Fedora (chromium, evoluti...

Installing Navidrome on Fedora Linux using Podman

Source: Fedora Magazine

Navidrome is an open-source music server that lets you stream your personal audio collection anywhere. It gives you freedom to listen to your music collection from any browser or mobile device. It's like your personal Spotify! In this guide, we will explore how to get Navidrome up and running secure...

Friday Five — September 25, 2026 | Red Hat

Source: Red Hat Blog

The blueprint for scalable enterprise security in the age of AI Throughout this series, we will unpack how Red Hat can help customers implement a layered security defense, from the operating system (OS) foundation to autonomous AI agents, ensuring enterprise resilience in the age of AI and emerging t...

Searching for the 2027 Red Hat Certified Professional of the Year

Source: Red Hat Blog

We're looking for the 2027 Red Hat Certified Professional of the Year! This award is more than just a title; it's a testament to the impactful work and dedication that all Red Hat Certified Professionals bring to the open source ecosystem. Every winner uses their hands-on Red Hat expertise to overco...

Automate security risk management across enterprise IT operations

Source: Red Hat Blog

Any modern IT strategy has to address the security risks fueled by AI. In the wake of headlines about powerful frontier AI models autonomously breaching security controls, IT operations and security leaders responsible for risk across hybrid environments are rapidly adjusting their approaches to vul...

Fedora Debates LibreOffice, Debian Builds for AI

Source: SavvyNik

Debian decided on the use of AI & LLMs in their project, and now their building a portal so that contributors can use AI/LLMs assisted coding agents to contribute work. Also we're seeing Fedora sparking debate on whether they're staying with LibreOffice and concerns have sparked some debate and dram...

Cloudflare Fixes Flaw That Let One Container Read Another Customer's Leftover Disk Data

Source: *The Hacker News*

A flaw in Cloudflare Containers let a paying customer read data that other customers' containers had left behind on the same server, Cloudflare and the researchers who found it said on Thursday. The data came from disk space that earlier containers had used and given up, not from any live workload,...

WSO2 and Adobe Commerce Flaws Exploited in Attacks, Added to CISA KEV

Source: *The Hacker News*

The U.S. Cybersecurity and Infrastructure Security Agency (CISA), on Thursday, added two critical security flaws impacting WSO2 and Adobe Commerce and Magento to its Known Exploited Vulnerabilities (KEV) catalog, based on evidence of active exploitation. The vulnerabilities are listed below - CVE-20...

Unpatched OnePlus Flaws Let Installed Android Apps Gain Root Without Permissions

Source: *The Hacker News*

A OnePlus 15 running the latest OxygenOS can be rooted by a malicious app the owner installs, one that asks for no special permissions. A researcher, Rasmus Moorats, chained two flaws in OnePlus's own software to gain root access, the highest level of control over an Android phone. OnePlus told him...

ThreatsDay: AI Search Poisoning, AI Coding Tool Leaking Repos, One-Click Code Execution and 13 More Stories

Source: *The Hacker News*

This week, the dangerous stuff keeps arriving dressed as something boring. An update. A login box. A search answer. A coding tool. A link you have clicked a hundred times before. That is the thread running through the pile. Trusted paths get poisoned. Old bugs find new jobs. AI tools leak more than...

Placeholder third-party[.]com Referenced Across 1,700+ Repositories Now Serves Malicious Content

Source: *The Hacker News*

The "third-party[.]com" domain, commonly used as a documentation placeholder, has been observed serving a ClickFix lure to Windows browsers while displaying a

harmless decoy to other users. "third-party[.]com has been a generic documentation placeholder for years, the same role example.com plays," M...

Hacked Ukrainian Sites Serve Fake Cloudflare ClickFix Lures for Psychedelic Stealer

Source: The Hacker News

An active ClickFix campaign has been observed compromising legitimate Ukrainian business websites to inject bogus Cloudflare verification pages and trick victims into downloading a previously undocumented information stealer called Psychedelic. "When a visitor interacts with the page, the lure copie...

Corp MDM Spyware Targets Logistics Firms, Steals New SMS and Redirects Calls

Source: The Hacker News

The logistics sector has become the target of a new malicious cyber campaign that distributes an Android spyware codenamed Corp MDM. According to Have I Been Squatted, the campaign uses fake Google Play pages branded as CEVA and TKW Logistics to distribute an Android Package Kit (APK) file that's dr...

Secrets Sprawl Is an Identity Problem That AI Just Made Impossible to Ignore

Source: The Hacker News

AI coding agents are changing how quickly developers can build and ship software as well as how quickly credentials can become exposed. According to GitGuardian's 2026 State of Secrets Sprawl Report, commits identified as AI-assisted are leaking secrets at approximately twice the rate of human-writt...

17,000 URLs Reveal How ClickFix Turns Trusted Websites Into Malware Traps: Report by CTM360

Source: The Hacker News

ClickFix has become the most common way attackers get into enterprise networks, and it does it without an exploit, an attachment, or a file on disk. Our new global threat report traces the technique from a novelty in late 2023 to a subscription product with on-chain infrastructure and a state-sponso...
