[$] Removing binder.c

Source: LWN.net

> The final talk at Kangrejos 2026 was about the removal of the C implementation of Android's Binder driver , the primary interprocess communication mechanism used on Android devices. Carlos Llamas announced that he had deleted the C code to general applause, and then shared some insights about what w...

Haas: Postgres 19 is late, and it's AI's fault

Source: LWN.net

> PostgreSQL developer Robert Haas writes about the struggles the project has encountered in putting together its next release. In the end, I don't think that the delay in shipping PostgreSQL 19 is particularly concerning. It is not a long delay in the grand scheme of things, and it emerges directly f...

Remote code execution on Linux systems with multipath TCP

Source: LWN.net

> On October 27, LLM provider Anthropic reported on a remotely exploitable use-after-free bug affecting systems with multipath TCP listeners open. The bug works by triggering a response to a retransmitted SYN packet at the same moment that the TCP connection is established in another thread, causing t...

[$] System-call wrappers for glibc

Source: LWN.net

> In a followup to his session at the 2025 Linux Plumbers Conference (LPC), Carlos O'Donell returned to the topic of system-call wrappers for the GNU C library (glibc) at this year's event. This time around, he was joined by Florian Weimer, who is another glibc maintainer. The idea was to give an upda...

Eight more stable kernel updates

Source: LWN.net

> Greg Kroah-Hartman has announced the release of the 7.3.1 , 7.2.14 , 6.18.60 , 6.12.115 , 6.6.161 , 6.1.191 , 5.15.224 , and 5.10.273 stable kernels. As usual, he

> advises all users to update—advice that seems especially wise given the increased number of security-relevant bug fixes that the kernel i...

Security updates for Friday

Source: LWN.net

> Security updates have been issued by AlmaLinux (aspell, cjose, curl, gcc-toolset-15-gcc, httpd:2.4, ignition, java-21-openjdk, libX11, libXi, libXrender, libXtst, mariadb:10.11, nodejs:24, python-pillow, python3.12-urllib3, and webkit2gtk3), Debian (imagemagick, libdatetime-timezone-perl, python-git...

How parental leave helped 2 new parents find their rhythm

Source: Red Hat Blog

> Becoming a parent brings so much excitement, and can have its fair share of challenges. At Red Hat, parental leave is designed so work isn't one of those worries. In 2025, we set an ambitious goal to implement a Global Paid Parental Leave policy, providing associates adding a child to their family—n...

Direct VM networking in AWS: Introducing BGP cloud connector on Red Hat OpenShift Service on AWS

Source: Red Hat Blog

> When migrating virtual machines (VMs) to the cloud, virtualization engineers hit a familiar wall: how do you route traffic directly to a Red Hat OpenShift Virtualization guest VM using that VM’s own IP address?OpenShift Virtualization has long offered a solution to this problem with localnets—as lon...

Proton Mail is Burning Down Right Now..

Source: SavvyNik

> Proton's CEO and CTO have been on a wild campaign.. telling their staff they have "loser thinking" and telling them to write more with AI as reported by 404 media..

Critical 9.8 Linux Kernel Severity Discovered in Networking..

Source: SavvyNik

> A new round of security vulnerabilities have been found and this time it’s in the Linux TCP networking stack. Distros are rushing to fix this one but you should know that if you have the MTCP extension enabled that you should be patching your server.

Proton Is Becoming Everything Its Users HATE

Source: SavvyNik

> Proton Mail is under HUGE backlash after it's CEO and CTO both have been pushing AI / LLMs on to their engineers. This is a wild story and drama that's now completely unfolding on Proton's Public Reddit page. We'll cover what happened and what's going on today including how it effects your privacy.....

Attackers Chain Three Ivanti Connect Secure Flaws to Gain Unauthenticated Root Access

Source: The Hacker News

> The U.S. Cybersecurity and Infrastructure Security Agency (CISA) on Friday added two security flaws impacting Ivanti Connect Secure (ICS) to its Known Exploited Vulnerabilities (KEV) catalog, following active exploitation in the wild. The vulnerabilities are listed below - CVE-2026-111357 (CVSS scor...

A Shared ChatGPT Link Could Run Attacker Code in Your Session and Read Private Chats

Source: The Hacker News

> A malicious ChatGPT share link could run an attacker's code in the logged-in session of anyone who opened it, allowing them to read their private conversations, researchers at the security firm Parameter showed. The researchers reported the flaw through OpenAI's bug bounty program on October 18, and...

Cloudflare Reports 18.2 Million Network-Layer DDoS Attacks in Q3, Up 38%

Source: The Hacker News

> Threat actors are launching about 8,226 network-layer distributed denial-of-service (DDoS) attacks per hour, Cloudflare revealed Thursday. The web infrastructure and security company said it autonomously mitigated 18.2 million network-layer (L3) DDoS attacks and 14.4 trillion HTTP DDoS requests in t...

Chinese Hackers Use AI-Powered ARTEX to Target Over 200 Organizations Worldwide

Source: The Hacker News

> Chinese state-sponsored threat actors have been observed using a Go-based artificial intelligence (AI)-powered penetration testing framework called ARTEX in attacks aimed at high-value targets simultaneously. The activity has been attributed by CrowdStrike to a China-based "targeted intrusion advers...

TeamViewer Flaw Lets Remote Computers Attack Users Who Connect to Control Them

Source: The Hacker News

> TeamViewer has fixed a flaw that lets the machine being controlled in a remote session attack the computer that connected to control it. In a TeamViewer session, the computer that connects and takes control is the viewer, and the machine it controls is the host. A malicious or compromised host can e...

WordPress RCE Flaw Draws Nearly 63,000 Attack Attempts in Just 24 Hours

Source: The Hacker News

> Threat actors have been observed attempting to exploit a high-severity security flaw in WordPress Core shortly after patches were released. The vulnerability, which does not have a CVE identifier, relates to a case of remote code execution impacting WordPress Core versions 4.7 through 7.1.3. It carr...

Trezor Warns of Suspected Hardware Implant in One of Its Wallets Sold by CryptoBilis

Source: The Hacker News

> A Trezor Safe 5 hardware wallet bought from the reseller CryptoBilis has an extra circuit board that sends out the recovery phrase over a mobile network, a customer has reported. Trezor has not yet examined the device. It is telling everyone who bought a Trezor from CryptoBilis since March 2026 to m...

Why Urgent Security Fixes Aren't Fixed. Observe, Prove, Act, Confirm Gets Them Moving

Source: The Hacker News

> The alert is critical. The fix is known. And the ticket sits in a queue for days. Security teams understand the risk, but the people who keep applications available need proof that the change won’t break anything. Their concerns are practical. An IPS protection could block legitimate traffic. A conf...

Syrian Hacker Behind Fake Tweet That Triggered $136 Billion Market Drop Gets 42 Months in Prison

Source: The Hacker News

> Ahmad Umar Agha, a Syrian Electronic Army hacker known online as "Th3Pr0," has been sentenced by a U.S. federal court to 42 months in prison for his role in a hacking conspiracy that targeted Western news outlets. The conspiracy was organized and led by members of former Syrian President Bashar al-A...
