### **[\$] LWN.net Weekly Edition for September 17, 2026**

Source: *LWN.net*

Inside this week's LWN.net Weekly Edition: Front : Server-data encryption; PostgreSQL scary patches; Faster kernel builds; BPF for blk-iocost; Lessons learned as DPL. Briefs : Brief news items from throughout the community. Announcements : Newsletters, conferences, security updates, patches, and mor...

### **Fedora 45 beta drags the Linux console into the 21st century (Register)**

Source: *LWN.net*

The Register looks forward to the upcoming Fedora 45 release. The biggest surprise is that Linux's legacy in-kernel console – the text-mode interface normally hidden beneath the GUI – has been replaced with a software-controlled alternative. The replacement is kmscon , a userspace terminal emulator...

### **[\$] Ways to encrypt data on servers**

Source: *LWN.net*

At the 2026 edition of FOSSY , Romeo Solano gave a fast-paced, humorous presentation on what could have been a rather boring topic: server encryption. There are a number of threats that we face in today's world, from criminals, government overreach, espionage, and more, that can be thwarted with enc...

### **Security updates for Wednesday**

Source: *LWN.net*

Security updates have been issued by AlmaLinux (kernel, kernel-rt, libkcapi, nginx, nginx:1.24, openssl, osbuild-composer, perl, perl:5.32, python-tornado, rsync, and rust), Debian (cjose and nginx), Fedora (environment-modules, erlang, GitPython, knot, perl-Authen-SASL, python-configargparse, ruby,...

### **Stop rewriting stable code: How Lightwell protects your bottom line and developer velocity**

Source: *Red Hat Blog*

How Lightwell breaks the forced-upgrade cycle to keep your systems protected and your developers focused on innovation. The Monday morning CISO nightmare Picture this: It's Monday morning. A critical, high-severity Common Vulnerabilities and Exposures (CVE) recently surfaced in an open source library...

## **Sovereign AI and data services with Duality and Red Hat**

*Source: Red Hat Blog*

Enterprise AI adoption is hitting a regulatory wall. Organizations in highly regulated sectors—from global banking to defense and life sciences—possess petabytes of valuable data. But privacy regulations, national data sovereignty mandates, and intellectual property risks prevent them from training...

## **Red Hat OpenShift: Where strategic vision meets enterprise execution**

*Source: Red Hat Blog*

Enterprise technology leaders face a defining operational challenge: rapid digital transformation isn't enough on its own. Teams are under relentless pressure to maintain a continuous, highly secure infrastructure while simultaneously driving AI-infused modernization across the entire business. Solv...

## **Red Hat named a Leader in the 2026 Gartner® Magic Quadrant™ for Server Virtualization Platforms**

*Source: Red Hat Blog*

Red Hat has been recognized as a Leader in the Gartner® Magic Quadrant™ for Server Virtualization Platforms for Red Hat OpenShift Virtualization. We are excited by this recognition, as we believe it reflects Red Hat OpenShift Virtualization as the modern virtualization capability of Red Hat OpenShif...

## **Red Hat and ACI deliver innovation in payments modernization, flexibility, and efficiency**

*Source: Red Hat Blog*

Introduction and context Financial institutions face constant pressure in payments processing to meet increasing consumer expectations of speed, functionality, and convenience. Additionally, the underlying payments infrastructure is subject to growing transaction volumes, evolving regulations, and th...

## **At industry turning point, Red Hat named a Leader in the Gartner® Magic Quadrant™ for Server Virtualization Platforms**

*Source: Red Hat Blog*

Over the past two years, I've sat down with hundreds of IT leaders navigating a profound virtualization turning point. Drastic market shifts and soaring licensing fees from legacy vendors have squeezed budgets, forcing enterprises to reevaluate their core infrastructure and seek a sustainable path f...

### **Attackers Exploit Issabel Framework Flaw Enabling Unauthenticated OS Command Execution**

*Source: The Hacker News*

A critical security flaw in Issabel Framework, a web-based framework for the open-source unified communications PBX software, has come under active exploitation. The vulnerability in question is CVE-2026-89026 (CVSS v3.1 score: 9.8/CVSS v4.0 score: 9.3), which can allow an unauthenticated remote att...

### **Three Threat Groups Target Russian Enterprises With Backdoors, Ransomware, and Wipers**

*Source: The Hacker News*

Enterprises in Russia have emerged as the target of three threat activity clusters tracked as NightEagle, Hacking Cat, and Toy Ghouls, according to multiple reports from Kaspersky. The cybersecurity vendor said it has identified attacks mounted by NightEagle (aka APT-Q-95), a threat actor known to b...

### **One Extension Could Hijack AI Assistants Across Chrome, Comet, Edge, Opera Neon and Claude**

*Source: The Hacker News*

Security researchers at Forever Security have shown that one ordinary browser extension could take control of the AI assistants built into five Chromium-based products: Gemini Live in Chrome, Perplexity Comet, Microsoft Edge, Opera Neon and the Claude in Chrome extension. Once the extension was inst...

### **Attacker Hijacks AI Coding Assistant Session, Spreads Shai-Hulud Across About 100 Repositories**

*Source: The Hacker News*

Mandiant says an attacker hijacked an active AI coding-assistant session at an unnamed software-as-a-service provider and later spread Shai-Hulud across about 100 internal code repositories. Before the repository spread, the assistant recommended software that the attacker had poisoned, and the reco...

## **Parallels Desktop Flaw Lets Non-Admin Mac Users Gain Root, but Intel Macs Can't Install Fix**

*Source: The Hacker News*

Parallels Desktop for Mac has a flaw that lets an ordinary local account run code as root, the highest level of access on a Mac, software company JFrog said this week. The attack needs code already running on the machine as a normal user, so it does not work over the network. JFrog says the fix is i...

## **N0va Phishkit Targets US and EU Businesses: A New Challenge for Identity Security**

*Source: The Hacker News*

N0va is targeting organizations across North America and Europe with phishing campaigns that impersonate trusted services and abuse legitimate authentication flows. Successful attacks can give threat actors access to valid accounts without relying on obvious malware activity. From there, a single co...

## **Google Patches Pixel Modem Flaw Amid Signs of Limited Targeted Exploitation**

*Source: The Hacker News*

Google has disclosed that a high-severity security flaw in its Pixel Cellular Modem has come under exploitation in the wild. The vulnerability, tracked as CVE-2026-58704 (CVSS score: 8.0), is a privilege escalation flaw. "In Cellular Modem, there is a possible permission bypass due to a logic error...

## **Threat Intelligence Alone Won't Close the Exploitation Gap**

*Source: The Hacker News*

A leaked credential shows up in a criminal marketplace, or a vulnerability gets a disclosure advisory, and either one can be weaponized against a real target before most security teams have triaged the alert. Attackers are combining that kind of intelligence with AI-assisted exploitation to accelera...

## **Acronis cPanel Backup Plugin Vulnerability Exploited in Targeted Attacks**

*Source: The Hacker News*

Acronis has warned that a high-severity security flaw in its Backup plugin for cPanel and Web Host Manager (WHM) deployments has been exploited in the wild. The vulnerability, tracked as CVE-2026-87886 (CVSS score: 7.8), is described as a case of local privilege escalation due to insecure file permi...
