Linux

Three new stable kernels for Tuesday

Source: LWN.net

> Greg Kroah-Hartman has released the 7.3.4 , 6.18.63 , and 6.12.117 stable kernels. The 7.3.4 kernel has more than 1,250 patches, 6.18.63 contains more than 860, and 6.12.117 includes more than 1,530 patches. Users of these kernels are, of course, encouraged to upgrade.

[$] Synaptics patent claims stop work on DisplayLink drivers

Source: LWN.net

> Mike Lothian owns a docking station (or dock) that uses a DisplayLink chipset that had, at least in his opinion, subpar performance on Linux. He decided to try improving the Linux driver, with LLM assistance, but ran into one problem that he could not solve—so he asked for help, hoping that Synaptic...

Firefox 160 released

Source: LWN.net

> Version 160 of the Firefox web browser has been released. Notable features in this release include the ability to block sites from asking to handle " mailto: " links, ability to play Matroska files with FLAC, MP3, or PCM audio, playback speed controls in the picture-in-picture video player, and a ne...

Security updates for Tuesday

Source: LWN.net

> Security updates have been issued by AlmaLinux (curl, dpdk, glibc, kernel, nodejs-nodemon, nodejs22, nodejs24, nodejs:18, nodejs:22, patch, qt5, qt5-qtdeclarative, ruby, ruby4.0, ruby:3.3, ruby:4.0, squid:4, tomcat, util-linux, and webkit2gtk3), Debian (symfony and tomcat10), Fedora (bind, dnf5, ker...

What should an AI policy actually govern?

Source: Red Hat Blog

> An open source policy is more than a set of organizational rules. It shapes how people contribute to and maintain a project. Contributors need to understand it.

> Maintainers need to apply it consistently. Community members need opportunities to question it. And projects need to be willing to change i...

Your move to Red Hat OpenShift Virtualization doesn't have to wait on VDDK

Source: Red Hat Blog

> If you've been planning a virtualization migration over the last few months, there's a good chance that the VMware Virtual Disk Development Kit (VDDK) has come up, and probably at a point in the project where you'd have preferred it didn't. Many migration and data protection tools use VDDK to read a...

With great power comes great sandboxing

Source: Red Hat Blog

> Making AI agents safe enough for the enterprise. Agentic systems like Hermes and OpenClaw let you orchestrate teams of agents with different personas, define them in Markdown files, and give them access to your email, file system, Jira, and the internet. That broad access to tools is what makes agen...

The next era of hybrid cloud: Introducing Red Hat OpenShift 5

Source: Red Hat Blog

> Yesterday at OpenShift Commons in Salt Lake City, I announced a major milestone for our community: the next evolution of our application platform with Red Hat OpenShift 5.If you go back to Red Hat Summit earlier this year, I talked about how IT teams face accelerating operational complexity. Over th...

Red Hat Enterprise Linux is ready for AMD 6th Gen EPYC™ 9006 Series Server CPUs

Source: Red Hat Blog

> Your Red Hat Enterprise Linux (RHEL) ecosystem already runs the work your business depends on. Now it can run that work with the AMD next-gen 9006 Series processors on an operating system your organization already trusts.Red Hat is bringing 6th Gen AMD EPYC™ support to Red Hat Enterprise Linux, the...

KubeVirt’s CNCF graduation recognizes a decade of community work and years in production

Source: Red Hat Blog

> Ten years after a team that included Red Hat engineer Fabian Deutsch, one of KubeVirt's original developers, made its first commits, the Cloud Native Computing Foundation (CNCF) has announced that the project has graduated. This is the foundation’s highest maturity level, placing KubeVirt alongside...

AI-assisted cluster updates in Red Hat OpenShift 5

Source: Red Hat Blog

> Red Hat OpenShift 5 introduces 2 capabilities that help OpenShift administrators with OpenShift updates, both built on Red Hat OpenShift Lightspeed. AI-powered update assessment is generally available, and agentic update is available as a Technology Preview. Together, they help you identify update i...

GPT-6 vs. Claude Cyberwar, SAP's 10.0 Flaws, Git RCE, Railway Hack & Nvidia Spy Scandal

My Linux Bundle is here: https://savvynik.com Think your Ready for Linux? Take my quiz: https://ready...

Security

We Built An Agent That Broke All of Our Security Rules. Here's What We Learned.

Source: The Hacker News

> We tell customers three things about securing AI agents: they need their own identities, access that fits the job they’re given, and traceability that’s separate from any human’s. That was true for us at Token as well. Then, we built an agent that broke all three by default. This helped us think thr...

eMudhra Revokes 8 More CAs It Previously Declared Unaffected by Key Compromise

Source: The Hacker News

> The in-house Python script behind eMudhra's October key compromise has now cost the company 8 more of its intermediate certificate authorities (CAs), even though it did not weaken their keys. Each intermediate CA has its own private key, which the company uses to sign the certificates it issues. The...

Microsoft Patches 1,259 Flaws, Including Exploited Outlook Bug That May Expose NTLMv2 Hashes

Source: The Hacker News

> Microsoft on Tuesday released patches for a total of 1,259 vulnerabilities spanning its software portfolio, the second consecutive month where the patch volume has

> exceeded 1,000 flaws. These cover 726 flaws in Windows, 174 in Office, 61 in Developer Tools, 59 in SQL Server, 53 in Developer Tools, a...

Railway Says Stolen Customer AI Keys Led to $740,000 in Estimated Unauthorized Usage Charges

Source: The Hacker News

> AI provider keys that customers stored on Railway were stolen in an October breach and used to commit an estimated $740,000 in unauthorized spending, the platform-as-a-service provider said yesterday. It has promised to pay those charges itself when an AI provider will not refund them. The company b...

Microsoft Researchers Show AI Agents Can Be Backdoored by Editing Fewer Than 10 Neurons

Source: The Hacker News

> An AI model can be given a hidden backdoor by editing fewer than 10 of its rarely used neurons, without retraining the model, Microsoft researchers have shown. When a chosen trigger appears, the model outputs an attacker's command, which an agent using that model would run with the agent's own permi...

Cisco BroadWorks and Openwave Flaws Actively Exploited Despite Available Patches

Source: The Hacker News

> The U.S. Cybersecurity and Infrastructure Security Agency (CISA) Tuesday added two security flaws impacting Cisco BroadWorks and Openwave Messaging Webtop Media Transcoder to its Known Exploited Vulnerabilities (KEV) catalog, citing evidence of active exploitation. Details of the vulnerabilities are...

Git Patches Flaw That Lets Malicious Repositories Execute Code During Recursive Clones

Source: The Hacker News

> A flaw in Git can let a malicious repository run an attacker's code on a computer that clones it recursively, together with its submodules. The Git project fixed it this week in Git 2.56.1, with matching fixes for the 2.50 through 2.55 series in 2.50.2, 2.51.3, 2.52.1, 2.53.1, 2.54.1 and 2.55.1. The...

SGLang RCE Exploit Breaches NEAR AI, Steals Data From 18 Agents and About 100 Users

Source: The Hacker News

> An attacker exploited a remote code execution flaw in SGLang, an open-source inference engine, and ran code on one of NEAR AI's inference servers last Sunday.

> The attacker could also have seen requests being processed on that server that day, including requests sent in confidential mode, the company...

Hackers Exploit Critical Xen Orchestra Auth Bypass Flaw to Gain Admin Access

Source: The Hacker News

> French software company Vates VMS has warned of a critical security vulnerability in Xen Orchestra that it said is being actively exploited in the wild. The authentication bypass flaw, which does not yet have a CVE identifier, is tracked as VSA-2026-062. "REST cookie parsing turns authenticationToke...

Three China-Nexus Espionage Campaigns Linked Through Sparrow Malware Ecosystem

Source: The Hacker News

> Three distinct threat activity clusters with shared infrastructure and malware code similarities have been observed targeting telecommunications providers, government organizations, military entities, research institutions, and critical infrastructure across Latin America, Asia, and Europe over the...

Attackers Exploit AhsayCBS Flaws to Deploy Sandbox-Evading Python Backdoor

Source: The Hacker News

> Cybersecurity researchers have disclosed details of an attack that exploited two now-patched vulnerabilities in AhsayCBS to deliver a Python-based implant. The activity, observed by Huntress in early October 2026, involves the exploitation of a chain comprising CVE-2026-105133 and CVE-2026-105134 to...

Blind Eagle Uses Fake Court Notices to Deliver Remote Access Trojan Across Latin America

Source: The Hacker News

> The threat actor known as Blind Eagle has resurfaced with a new campaign targeting organizations in Latin America through judicial and administrative-themed phishing lures to deliver a remote access trojan (RAT) that shares its lineage with AsyncRAT and DCRat. "The campaign uses Portuguese and Spani...

Fireworks AI Confirms Wider Breach Affecting Customer Datasets, Model Weights and Notion AI Chats

Source: The Hacker News

> Fireworks AI disclosed on Monday that its investigation into a security incident first reported early last month uncovered further malicious activity, affecting account

> and billing information, alongside secrets, datasets, and incomplete models for a "limited set of accounts." In a notice published...
