[\$] LWN.net Weekly Edition for September 10, 2026

Source: *LWN.net*

Inside this week's LWN.net Weekly Edition: Front : Rust's never type; Debian and CERN; memory tiering; testing multithreaded Python; fixing TCMalloc; Typst. Briefs : Rustls; Asahi Linux; Buildroot 2026.08; Grml 2026.09; Audacity 4.0; Jellyfin 12.0; LibreOffice Base; Quotes; ... Announcements : Newsl...

A decade of Rustls

Source: *LWN.net*

Joe Birr-Pixton has written a blog post reflecting on a decade of the Rustls TLS-library project and looking ahead to the upcoming 0.24 release and an eventual 1.0 release. Rustls began with a first commit on May 2, 2016. Progress was quick: a month later, on June 5, it could interoperate with most...

LibreOffice Base survey results

Source: *LWN.net*

Heiko Tietze has published a blog post summarizing the results of a recent survey about the use of LibreOffice's database application, Base. 455 people participated in the survey, including more than 330 who use Base on Linux, with use cases ranging from maintaining records of personal media such as...

[\$] Typst makes big strides

Source: *LWN.net*

Typst is a system for typesetting documents into various formats: PDF, SVG, PNG, and, in progress, HTML. It is adept at handling technical material, and is often considered to be an eventual LaTeX replacement. We last looked in on Typst a year ago, when it had reached version 0.13. A new version, 0....

Security updates for Wednesday

Source: *LWN.net*

Security updates have been issued by AlmaLinux (expat, glib2, microcode_ctl, mrtg, pam, redis, thunderbird, and valkey), Debian (fort-validator, gst-plugins-

base1.0, kernel, and slurm-wlm), Fedora (complyctl, libevent, openvpn, and tar), Mageia (dovecot and spice-vdagent), Red Hat (ignition, opentel...

The Lightwell reality check

Source: Red Hat Blog

We've been talking with business leaders about Lightwell for the past few months, and the conversation always starts with enthusiasm. AI-driven exploits are moving at unprecedented speeds, and enterprise security teams are feeling a level of urgency we haven't seen in decades. When organizations dis...

Red Hat sponsors the OpenClaw Foundation to advance an open future for production AI agents

Source: Red Hat Blog

In July, the OpenClaw Foundation was announced with Red Hat joining as a sponsor to bring open, more secure infrastructure to autonomous AI agents. OpenClaw has quickly become a premier open source autonomous agent framework, and Red Hat's involvement aims to bring the enterprise readiness and infra...

Red Hat AI 3.5: Scaling and governing AI agents in production

Source: Red Hat Blog

Enterprise teams have moved past early experimentation. Pilots succeed, prototypes impress, and individual teams deliver initial results. The challenge every platform engineering and ITops team hits next is much harder: operating AI with the same operational rigor as mission-critical AI infrastru...

Rafay and Red Hat publish joint reference architecture for sovereign AI cloud as a service

Source: Red Hat Blog

Red Hat has published Sovereign AI Cloud as a Service, a joint reference architecture built with Rafay for telecommunications providers, sovereign cloud operators, and NeoClouds that want to turn distributed GPU infrastructure into a governed, self-service, revenue-generating AI cloud. Built on Red H...

Accelerating post-quantum security migration with Red Hat Certificate System

Source: Red Hat Blog

The realities of quantum computing and its inevitable impact on enterprise cryptography are already taking shape: Red Hat Enterprise Linux has been post-

quantum cryptographically (PQC)-capable since the launch of Red Hat Enterprise Linux 10 (RHEL) in 2025. Hyperscalers like AWS and Google Cloud Platfo...

Beyond container boundaries: Kernel-level agent security in Red Hat OpenShift AI 3.5

Source: Red Hat Blog

77% of organizations now have AI agents running in production. The adoption curve is steep. The governance curve is not. Agents operate over-permissioned and often without full security sign-off. "Organizations must broaden the extent of AI governance in the operational realm."1 Shadow AI incidents...

Nearly 1 in 10 Exposed LiteLLM Gateways Accepted the Example "sk-1234" Admin Key

Source: The Hacker News

Nearly one in ten of the internet-facing LiteLLM servers that Wiz Research scanned in February accepted sk-1234, the example admin key in LiteLLM's own setup guide. LiteLLM is an open-source AI gateway, the software a company puts between its applications and the model providers it pays for. That ke...

Anthropic Discloses Fourth AI Hacking Incident Involving Claude Opus 4.6

Source: The Hacker News

Anthropic on Wednesday disclosed a fourth incident in which its artificial intelligence (AI) model broke into real third-party systems, marking the latest in a growing list of cases that have raised concerns about the security risks posed by autonomous AI agents. The AI company said the incident dat...

U.S. Disrupts Xinbi Guarantee Scam Marketplace, Freezes \$52.8 Million in Crypto

Source: The Hacker News

The U.S. Department of Justice (DoJ) on Wednesday announced coordinated actions aimed at an illicit online marketplace called Xinbi Guarantee that offered scam services, including seizing Telegram channels used to run the service, confiscating two cryptocurrency wallets, and deploying the Scam Cente...

Four Spy Groups Used the Same Chrome and Windows Exploit Kit Within a Week

Source: The Hacker News

Multiple espionage-motivated threat activity clusters have been found deploying a previously undocumented exploit kit called BlueMoon that chains together multiple vulnerabilities in Microsoft Windows and Google Chrome. The first in-the-wild use of BlueMoon has been attributed to the China-aligned s...

Infostealer Logs Expose Replayable AI Tokens That Can Bypass MFA

Source: The Hacker News

Cybercriminals are hijacking artificial intelligence (AI) user accounts via information stealer logs to create "stolen keys" that grant illicit access to tools from model providers like Google, Anthropic, and others. Information stealers like Lumma Stealer or Vidar are equipped to harvest a wide ran...

Webinar: Learn How to Answer "Are We Exposed?" Faster After a New CVE

Source: The Hacker News

A major vulnerability is disclosed. The alert lands immediately. Then comes the harder question: Are we actually exposed? For many security teams, answering that means jumping between vulnerability scanners, endpoint tools, cloud inventories, SBOMs, repositories, and application data to build enough...

DeepSeek Harness Flaw Let AI Agents Disable Their Own File Sandbox Without Approval

Source: The Hacker News

A flaw in DeepSeek Harness, DeepSeek's open-source tool for running AI coding agents on a developer's machine, let a sandboxed agent turn off its own sandbox with a single command. The tool runs an agent's commands inside an operating-system sandbox, so that an agent working on untrusted files canno...

Alby Hub Critical Flaw Could Let Attackers Take Over Internet-Exposed Bitcoin Wallets

Source: The Hacker News

Bitcoin wallet company Alby has warned of a critical flaw in Alby Hub that could have let an attacker take over a wallet and send its funds, but only where the owner had made the Hub reachable from the internet. Alby Hub is a self-hosted Lightning wallet, meaning the owner runs it on their own compu...

U.S. Agencies Accuse China AI Firms of Distilling Claude, GPT, Gemini, and Grok

Source: *The Hacker News*

U.S. cybersecurity and intelligence agencies have accused China-based artificial intelligence (AI) companies of conducting "systematic extraction" of proprietary functionalities and capabilities of American frontier models through distillation attacks. The activity has been described as occurring at...
