Linux

Kernel prepatch 7.3-rc5

Source: *LWN.net*

The 7.3-rc5 kernel prepatch is out for testing. Linus said: " I don't think there's any real pattern to it other than 'big'. But nothing looks particularly alarming, I think that despite the diffstat it's just the same old, same old. "

Why Red Hat is building secure agent onboarding

Source: *Red Hat Blog*

Every enterprise AI conversation we've had this year ends in the same place. A team has an agent that works. It writes code, calls internal APIs, fixes its own mistakes. Then someone asks what happens when 1,000 of these run across the company, and the room goes quiet. That is the problem we kept hea...

Securing AI agents requires securing the systems around them

Source: *Red Hat Blog*

Enterprise AI is changing from software that primarily generates information to software that can take action. AI agents can call APIs, invoke tools, access files and credentials, communicate over networks and interact directly with business systems. That capability is useful precisely because it gi...

F-Droid 2.0 - The Biggest Update In Years

Source: *Mental Outlaw*

In this video I discuss the biggest update to F-Droid in years, better search features and a more modern looking user interface. My merch is available at <https://based.win/> Subscribe to me on Odysee.com <https://odysee.com/@AlphaNerd:8> Help Support the Channel by Donating Crypto [Monero 45F2bN...](#)

Linux is Wild: AI Agents, Rust Drivers, 10-Second Kernel Builds & New Desktops

Source: *SavvyNik*

Big week for Linux as Rust continues to be more widely used language in Linux and open source projects.. we also get 10 Second Kernel builds and AI coming for

Linux. KDE and GNOME also have major updates this week. Let's review this weeks Linux and open source news. My Linux Bundle is here: <https://mylinuxbundle.com/>

JADEPUFFER-Linked Attackers Used Compromised Service Principals to Delete Azure Resources

Source: The Hacker News

The threat actor known as JADEPUFFER has been observed orchestrating destructive actions within a Microsoft Azure environment using compromised service principals. Microsoft, which is tracking the activity under the name Storm-3168, has called it an evolution of the threat actor's tradecraft. The at...

CISA Says Attackers Are Exploiting Two Critical Citrix NetScaler Flaws Globally

Source: The Hacker News

The U.S. Cybersecurity and Infrastructure Security Agency (CISA) on Sunday added two critical Citrix NetScaler ADC and Gateway flaws to its Known Exploited Vulnerabilities (KEV) catalog, following reports of active exploitation. The vulnerabilities are listed below - CVE-2026-88771 (CVSS score: 9.5)...
