Linux

Kernel prepatch 7.4-rc1

Source: LWN.net

> The 7.4-rc1 kernel prepatch is out, and the merge window is closed for this development cycle. This is a *BIG* merge window. I think the reason is the by now obvious one, but I'm actually taking it as a good sign: I'm *much* happier with the flood of AI triggered work going into the merge window tha...

Final release for the 7.2 stable series

Source: LWN.net

> Greg Kroah-Hartman has announced the release of the 7.2.15 kernel, with a handful of updates. Note, this is the LAST 7.2.y kernel release. After this one the 7.2.y kernel tree is end-of-life. Please move to 7.3.y at this time. And yes, you aren't imagining things, this one went "end-of-life" a bit s...

Progress Report: Linux 7.2

Source: Asahi Linux Blog

> Linux 7.2 has been released! That was fast. Let’s dive in to yet another Asahi Linux progress report. We’ve got a lot of interesting developments for you today, so make yourself a cuppa and enjoy. Think Different… again The Apple Silicon platform’s power management infrastructure is complicated. Res...

Progress Report: Linux 7.1

Source: Asahi Linux Blog

> Linux 7.1 is now here, and of course with it comes another progress report. We’ve got M3 progress, Apple bugs, and more! Welcome back Master Boot Record When you long-press the power button on your Mac to bring up the boot picker (or use the Startup Disk application), what you see listed as Asahi is...

Progress Report: Linux 7.0

Source: Asahi Linux Blog

> After almost three years of 6.x series kernels, Linux 7.0 is finally here. That means it’s also time for another Asahi progress report! Automate Everything Users of

> alternate distros and keen-eyed individuals may have noticed some changes to the Asahi Installer. After almost two years, we finally go...

Progress Report: Linux 6.19

Source: Asahi Linux Blog

> Happy belated new year! Linux 6.19 is now out in the wild and… ah, let’s just cut to the chase. We know what you’re here for. The big one Asahi Linux turns 5 this year. In those five years, we’ve gone from Hello World over a serial port to being one of the best supported desktop-grade AArch64 platfo...

Progress Report: Linux 6.18

Source: Asahi Linux Blog

> Linux 6.18 has released, and we have a bit to talk about for this holiday season progress report! More upstreaming madness Last time, we announced that the core SMC driver had finally been merged upstream after three long years. Following that success, we have started the process of merging the SMC’...

Progress Report: Linux 6.17

Source: Asahi Linux Blog

> Another upstream kernel release means it must be time for a progress report! The patches keep coming As always, upstreaming continues. The highlight of this cycle is finally landing the SMC core driver, after discussions on the mailing list going all the way back to 2022! Along with the core driver,...

Progress Report: Linux 6.16

Source: Asahi Linux Blog

> With Linux 6.16 now out in the wild, it’s time for yet another progress report! As we mentioned last time, the Asahi and Honeykrisp Mesa drivers have finally found their way upstream. This has resulted in a flurry of GPU-related work, so let’s start there. No missing nuts in this Flatpak For quite s...

Progress Report: Linux 6.15

Source: Asahi Linux Blog

> Linux 6.15 is right around the corner, which means it’s time for another progress report! We have been pretty busy behind the scenes and we have some exciting developments to share with you all. Fedora Asahi Remix 42 Release Last time, we announced that Fedora Asahi Remix 42 was close to release. It...

Progress Report: Linux 6.14

Source: Asahi Linux Blog

> As March draws to a close and Linux 6.14 nears release, now is a good time to provide you all with our first major progress update since taking the lead on the project. Going forward, we hope to keep these updates in sync with upstream kernel releases. We feel that this is a natural cadence given th...

Passing the torch on Asahi Linux

Source: Asahi Linux Blog

> With a heavy heart, we announce the resignation of Asahi Linux founder Hector Martin (marcan). His statement is on his blog. Asahi Linux brings Linux to Apple Silicon, supporting audio, webcams, graphics acceleration, and more. As the remaining developers, we are taking this as an opportunity to bui...

Beyond Gaming: X11 bridging in muvm

Source: Asahi Linux Blog

> Hi everyone! We've just shipped a really cool update to our x86/x86-64 emulation stack on Asahi Linux, and I wanted to share what we've been working on. As of today, non-game apps are now usable! Cisco Packet Tracer running on Fedora Asahi Remix Native graphics in VMs As you might remember from our...

AAA gaming on Asahi Linux

Source: Asahi Linux Blog

> Gaming on Linux on M1 is here! We're thrilled to release our Asahi game playing toolkit, which integrates our Vulkan 1.3 drivers with x86 emulation and Windows compatibility. Plus a bonus: conformant OpenCL 3.0. Asahi Linux now ships the only conformant OpenGL®, OpenCL™, and Vulkan® drivers for this...

Vulkan 1.3 on the M1 in 1 month

Source: Asahi Linux Blog

> Finally, conformant Vulkan for the M1! The new "Honeykrisp" driver is the first conformant Vulkan® for Apple hardware on any operating system, implementing the full 1.3 spec without "portability" waivers. Honeykrisp is not yet released for end users. We're continuing to add features, improve perform...

Conformant OpenGL 4.6 on the M1

Source: Asahi Linux Blog

> For years, the M1 has only supported OpenGL 4.1. That changes today – with our release of full OpenGL® 4.6 and OpenGL® ES 3.2! Install Fedora for the latest M1/M2-series drivers. Already installed? Just dnf upgrade --refresh. Unlike the vendor's non-conformant 4.1 drivers, our open source Linux driv...

New in Fedora Asahi Remix

Source: Asahi Linux Blog

> We’re very proud to have released the first stable release of Fedora Asahi Remix not too long ago, and now it’s time to go over everything we’ve been up to. You may have wondered what’s up with the radio silence for the past few months. The answer is that we’ve been busy cramming in as many features...

The first conformant M1 GPU driver

Source: Asahi Linux Blog

> Conformant OpenGL® ES 3.1 drivers are now available for M1- and M2-family GPUs. That means the drivers are compatible with any OpenGL ES 3.1 application. Interested? Just install Linux! For existing Asahi Linux users, upgrade your system with dnf upgrade (Fedora) or pacman -Syu (Arch) for the latest...

Our new flagship distro: Fedora Asahi Remix

Source: Asahi Linux Blog

> You’ve all been waiting for it, many of you have guessed, and now, as announced at Flock To Fedora, it’s time to make it official: The new Asahi Linux flagship distribution will be Fedora Asahi Remix! We’re confident that this new flagship will get us much closer to our goal of a polished Linux expe...

OpenGL 3.1 on Asahi Linux

Source: Asahi Linux Blog

> Upgrade your Asahi Linux systems, because your graphics drivers are getting a big boost: leapfrogging from OpenGL 2.1 over OpenGL 3.0 up to OpenGL 3.1! Similarly, the OpenGL ES 2.0 support is bumping up to OpenGL ES 3.0. That means more playable games and more functioning applications. Back in Decem...

Paving the Road to Vulkan on Asahi Linux

Source: Asahi Linux Blog

> Hello everyone, Asahi Lina here! As you probably know, I’ve been working together with the rest of the Asahi Linux team on open source GPU drivers for Apple Silicon platforms. It’s been a wild ride! Just at the end of last year we released the first version of our drivers, after many months of reve...

Apple GPU drivers now in Asahi Linux

Source: Asahi Linux Blog

> Hello everyone! We’re excited to announce our first public Apple Silicon GPU driver release! We’ve been working hard over the past two years to bring this new driver

> to everyone, and we're really proud to finally be here. This is still an alpha driver, but it's already good enough to run a smooth de...

Tales of the M1 GPU

Source: Asahi Linux Blog

> Hello everyone, Asahi Lina here! marcan asked me to write an article about the M1 GPU, so here we are~! It's been a long road over the past few months and there's a lot to cover, so I hope you enjoy it! What's a GPU? You probably know what a GPU is, but do you know how they work under the hood? Let...

Updates galore! November 2022 Progress Report

Source: Asahi Linux Blog

> Time for another overdue progress report! This month's update is packed with new hardware support, new features, and fixes for longstanding pain points, as well as a new bleeding-edge kernel branch with long-awaited support for suspend and the display controller! If you're new to Asahi Linux, check...

M2 is here! July 2022 Release & Progress Report

Source: Asahi Linux Blog

> UPDATE / NOTE: M2 machines have been fully supported and stable for a long time now. If you are reading this article today, this in no way represents the current state of support for M2 machines. Just install normally. Welcome to another long overdue progress report! As usual, things have been busie...

The first Asahi Linux Alpha Release is here!

Source: Asahi Linux Blog

> It's been a long while since we updated the blog! Truth be told, we wanted to write a couple more progress reports, but there was always "one more thing"… So, instead, we decided to take the plunge and publish the first public alpha release of the Asahi Linux reference distribution! We're really exc...

Progress Report: October-November 2021

Source: Asahi Linux Blog

> Whoops, things got so busy we ended up skipping a month! A lot has been going on in kernel land over the past couple of months, so we hope you enjoy this combined October-November progress report! M1 Pro/Max joins the family At the end of October, Apple launched the next generation of Apple Silicon:...

Progress Report: September 2021

Source: Asahi Linux Blog

> It’s been a busy month! We’ve had a lot of movement in kernel land, as well as some tooling improvements and reverse engineering sessions. At this point, Asahi Linux is usable as a basic Linux desktop (without GPU acceleration)! The ground had been shifting until now, but we’re seeing drivers settle...

Progress Report: August 2021

Source: Asahi Linux Blog

> It’s been a long time since the last update! In all honesty, the first Progress Report set the bar a little bit too high, and I found it difficult to sit down and put together monthly reports that would do it justice. So, going forward, we’re going to be providing shorter-form updates while striving...

Progress Report: January / February 2021

Source: Asahi Linux Blog

> Welcome to the first Asahi Linux Progress Report! In this series we’ll be taking a page from the Dolphin playbook and giving you monthly updates on the progress of the project. Bringing up support for a new system-on-chip on Linux is no small task! I hope this series will be educational to everyone...

Sony Is Killing Physical Games and Blu-ray Movies

Source: Mental Outlaw

> This video examines the current state of PlayStation 5 physical games and the broader decline of physical media. Sony is ending PlayStation discs, and want to create a future with no game rentals or 2nd hand copies. They are ending all production of Blu-ray players, Blu-ray discs, and want their cus...

X Has Shut Down Nitter

Source: Mental Outlaw
