[$] LWN.net Weekly Edition for October 15, 2026

Source: LWN.net

> Inside this week's LWN.net Weekly Edition: Front : 2026 Maintainers Summit; Rust goals; GCC and LLMs; GCC CFI; systemd; C types in Rust; LTTng; Swap showdown; KDE Linux. Briefs : 64-day certificates; Nix and Lix security; Asterinas 0.19.0; LineageOS 24; KDE 6.8; Python 3.15; Quotes; ... Announcement...

[$] Collaborating with out-of-tree tracers

Source: LWN.net

> LTTng creator Mathieu Desnoyers seems a bit trapped in something of a catch-22 . At the 2026 Linux Plumbers Conference (LPC), he led a discussion on the problem he is having in trying to collaborate with other tracing projects (e.g. ftrace , perf) in the kernel. The feedback he has gotten, both ove...

Linus Torvalds's first LLM-assisted patch series

Source: LWN.net

> At the recently concluded Maintainers Summit , Linus Torvalds said that he had been using a large language model to work on a patch series addressing a longstanding problem; he has now posted that series for review . The fairly short series of ten patches basically enhances folio lookup by noticing...

KDE Plasma 6.8 released

Source: LWN.net

> Version 6.8 of the KDE Plasma desktop has been released. The The KDE project has timed the release to coincide with the 30th anniversary of Matthias Ettrich's email announcing the project: Unix popularity grows thanks to the free variants, mostly Linux. But still a consistent, nice looking free desk...

[$] GCC development with large-language models

Source: LWN.net

> After much deliberation, the GCC project recently came up with a policy on the use of large language models for development of the compiler suite. It is somewhat

> restrictive, but still leaves room for LLMs in the development process. At the 2026 GNU Tools Cauldron , Jeff Law and Kyrill Tkachov discu...

Security updates for Wednesday

Source: LWN.net

> Security updates have been issued by AlmaLinux (bind9.18, dovecot, flatpak, gd, jackson-core, jackson-databind, jackson-jaxrs-providers, and jackson-modules-base, kernel, opentelemetry-collector, pcre2, and tftp), Debian (curl and keystone), Fedora (aegisub, arm-none-eabi-binutils-cs, avr-binutils,...

Top 5 operators for Red Hat OpenShift

Source: Red Hat Blog

> In the 1980s, the spreadsheet was considered such a valuable tool that would make buying a computer just to run it worthwhile. The term coined to describe such an application was a killer app. Is there an equivalent for Red Hat OpenShift? When it comes to tools that boost the value of the platform a...

One SoC. Two worlds. Zero compromise: How Red Hat In-Vehicle Operating System and DXC AMBER come together in a mixed-criticality software-defined vehicle solution

Source: Red Hat Blog

> At ELIV 2026 in Baden-Baden, Red Hat and DXC are showcasing a software-defined vehicle (SDV) platform that brings together AD/ADAS and digital cockpit workloads on a single high-performance compute platform, with Red Hat In-Vehicle Operating System providing an ISO 26262 ASIL-B certified Linux found...

How to patch application vulnerabilities without upgrading

Source: Red Hat Blog

> Summary Most enterprise applications cannot be fixed simply by upgrading to the latest version of an impacted library.Lightwell delivers backported security fixes at your exact production library versions with cryptographically signed artifacts and SBOM included for compliance.Red Hat® Ansible® Auto...

AI tokenomics: Balancing open-weight and frontier models for optimal ROI

Source: Red Hat Blog

> Why airlines don't fly all-first-class planes and what it teaches us about AI strategyAirlines learned very early that they can't optimize a profitable route selling every seat as first class. Instead, the aircraft has multiple cabins, and the airline sizes each according to the route, the season, a...

Advancing NetOps-as-Code: Strategic momentum, enhanced security, and multimode automation

Source: Red Hat Blog

> The 3rd quarter of 2026 has shown that network automation isn’t just a "nice to have," but rather a critical support for AI-driven workloads, edge computing, and hybrid cloud environments. Organizations are moving away from manual Day 2 operations and ad hoc solutions to a comprehensive, integrated...

Linux News: Void AI Drama, 100+ Packages Dropped, DLSS 5 on Linux, Rust & MORE

Source: SavvyNik

> Big week for Linux as AI/LLM Drama just unfolded in Void Linux in which a maintainer dropped over 100 packages during a dispute. DLSS is being brought to Nvidia GPUs on Linux and we're seeing yet another project be moved to Rust from C on Linux. Let's cover this weeks news in Linux and Open Source M...

GhostAction Compromises About 1,900 GitHub Accounts, Targets Over 30,000 Repositories

Source: The Hacker News

> The credential-theft campaign known as GhostAction has ramped up, targeting more than 30,000 repositories across 3,000 users and organizations. The spike, according to GitGuardian, was observed on October 8 and 9, 2026. "This resulted from compromising the GitHub accounts of about 1,900 users. It at...

Langflow's Critical Authenticated RCE Flaw Targeted in 1,423 Honeypot Exploit Attempts

Source: The Hacker News

> Threat actors are exploiting a critical security flaw in Langflow, according to an alert from Previdian. Langflow is an open-source platform that allows developers to build artificial intelligence (AI) applications and agentic workflows. In February 2025, DataStax, the parent company of Langflow, wa...

AhsayCBS Flaws Exploited to Deploy Web Shells Get New Fixes After Incomplete Patches

Source: The Hacker News

> Singapore-based Ahsay Backup has released security updates to address two security flaws in AhsayCBS that have been exploited by bad actors to drop web shells and XMRig cryptocurrency miners. The vulnerabilities in question are CVE-2026-105133 and CVE-2026-105134, which could be chained to sidestep...

Palo Alto Networks Patches PAN-OS Authenticated RCE Flaw Amid Active Exploitation

Source: The Hacker News

> Palo Alto Networks on Wednesday issued security updates for a high-severity flaw in PAN-OS software that has come under active exploitation. The vulnerability, tracked as CVE-2026-0322 (CVSS score: 8.6), is a case of remote code execution in the management interface. "A remote code execution (RCE) v...

Cisco Warns of Active Attacks Exploiting New Critical Secure Email Gateway Vulnerability

Source: The Hacker News

> Attackers are exploiting a critical flaw in Cisco Secure Email Gateway that lets a sender with no login write files to the appliance's operating system, Cisco said in an advisory on Wednesday. The attacker sends an email with a crafted attachment through the gateway and, if it succeeds, could then r...

Hackers Backdoor Nextcloud Servers Through Critical Flaw in Collabora’s Built-in CODE App

Source: The Hacker News

> Attackers exploited a flaw in an optional Nextcloud app, Collabora Online - Built-in CODE Server, to plant web shells on Nextcloud servers. Three administrators reported the issue on GitHub, with the first logged attack on September 10. A web shell is a small file that executes any command an attack...

Microsoft Disrupts 3 Phishing Kits Linked to Over 1 Billion Scam Messages

Source: The Hacker News

> Microsoft and Health-ISAC, along with the Japan Cybercrime Control Center (JC3) and a coalition of private sector companies, such as Resecurity, Cloudflare, Oracle, Proofpoint, and TRM Labs, announced the disruption of three phishing kits, CoGUI (aka NX or FA), Haozi (aka Phoenix), and Iron Man Syst...

U.S. Shuts Down Over 40 Laptop Farms, Charges 14 in North Korean IT Worker Fraud

Source: The Hacker News

> The U.S. Department of Justice (DoJ) on Tuesday charged 14 people and seized about 187 computers and KVM devices as part of its ongoing efforts to disrupt North Korea's fraudulent remote IT worker (ITW) scheme. The indictment charges a mix of U.S. citizens and Chinese nationals for their roles in an...

CISA Urges Immediate Ivanti Connect Secure Updates as Honeypots Log 105 Exploit Attempts

Source: The Hacker News

> The U.S. Cybersecurity and Infrastructure Security Agency (CISA) on Tuesday urged organizations to take steps to immediately update their Ivanti Connect Secure (ICS) appliances and deployments to the latest version following the disclosure of an actively exploited vulnerability. The security flaw, t...

curl Patches HTTP/2 Upload Flaw After PoC Demonstrates Client-Side Code Execution

Source: The Hacker News

> A flaw in how curl handles HTTP/2 uploads lets a malicious server receiving an upload corrupt the client's memory, and the researcher who reported it turned that into code execution on the uploading machine. The curl project fixed it on October 14 in curl 8.23.0. Taking over a client needs exact kno...

How to Run a Deepfake Readiness Drill Before a Cloned Voice Calls Your Team

Source: The Hacker News

> Cloned voices and synthetic video calls now show up in payment fraud, help desk resets, and access requests. A structured drill shows security teams exactly where verification breaks down, while nothing is at stake. The call comes in at 4:40 on a Friday. It's the CFO, or it sounds exactly like her,...

Researchers Used a Public OpenAI Model to Build a $250,000 Chrome Full-Chain Exploit in Six Days

Source: The Hacker News

> A team at security firm XBOW chained three then-unknown Google Chrome bugs into a single attack that runs code on a Windows computer when the user only loads a web page, the company said. Its researchers built the attack in six days by directing AI agents running OpenAI's publicly available GPT-5.6...

Hirudo Android Trojan Uses Patched Banking Apps to Bypass Their Built-In Security Checks

Source: The Hacker News

> Cybersecurity researchers have disclosed details of a new Android banking trojan called Hirudo that works by replacing legitimate banking apps with purpose-built patched versions designed to bypass security checks from inside the app itself, marking a new escalation in financial fraud. Dutch mobile...

An AI Agent Found a Critical OTP Bypass in Production. The Attack Was the Easy Part.

Source: The Hacker News

> The bug was simple: the login let you choose where your sign-in code went. Proving it on a live website was the hard part. TL;DR During an authorized assessment, an AI pentesting agent found a critical authentication bypass on a major insurer's production website, on its own. One login request let t...
