GDB 18.1 released

Source: *LWN.net*

Version 18.1 of the GDB interactive debugger has been released. Changes include new commands to manipulate the environment of the subprocess, the ability to save the command history to a file, support for a couple of new targets, several Python API additions, and more. See the NEWS file for the comp...

Warning: Two Unpatched Citrix NetScaler RCE Zero-Days Under Active Exploitation

Source: *The Hacker News*

Two new unpatched zero-day vulnerabilities in Citrix NetScaler ADC and NetScaler Gateway appliances that allow remote code execution are being actively exploited in the wild, security firm watchTowr said on September 26. Citrix has not confirmed the flaws or published a fix. Some administrators say...

Lunex Stealer Abuses AMD Driver to Disable Security Monitoring and Steal Browser Credentials

Source: *The Hacker News*

The Psychedelic Stealer malware distributed via compromised Ukrainian websites using ClickFix-style Cloudflare verification checks is part of a wider malware-as-a-service (MaaS) platform called Lunex. The new findings come from Ontinue, which described the activity as a four-stage attack chain aimed...

Attackers Bypass WAFs to Exploit Oracle PeopleSoft Flaw and Deploy Web Shells

Source: *The Hacker News*

Google is warning of renewed mass exploitation of a known security vulnerability in Oracle PeopleSoft as part of a campaign targeting multiple sectors globally. The ShinyHunters-linked activity involves the weaponization of CVE-2026-35273 (CVSS score: 9.8), a critical security flaw that could result...

Zero Trust for AI Agents Starts With Fixing Zero Visibility

Source: *The Hacker News*

The way we talk about AI agents is shifting, and the way we implement them requires an even more fundamental shift. While earlier discourse focused on how quickly organizations could stand up agents and how much productivity they could promise, a string of recent incidents, including a widely discus...

Elementor CSRF Flaw Lets Attackers Take Over Sites After Admin Clicks Crafted Link

Source: *The Hacker News*

Details have emerged about a high-severity security flaw in the Elementor Website Builder WordPress plugin that could be exploited by an unauthenticated attacker to create rogue administrator accounts and take control of a site. The cross-site request forgery (CSRF) vulnerability, which has yet to b...

SharePoint RCE and MikroTik RouterOS Flaws Actively Exploited in the Wild

Source: *The Hacker News*

The U.S. Cybersecurity and Infrastructure Security Agency (CISA) on Friday added two security flaws impacting Microsoft SharePoint and Mikrotik RouterOS to its Known Exploited Vulnerabilities (KEV) catalog, citing evidence of active exploitation. The vulnerabilities in question are as follows - CVE-...

Kiteworks Urges Customers to Shut Down Systems for 9 Hours Over Possible Cyber Attack

Source: *The Hacker News*

Kiteworks (formerly Accellion) is urging customers to shut down their systems as a precautionary measure for nine hours over the weekend after it received threat intelligence about an imminent cyber attack. "Kiteworks received credible threat intelligence from federal intelligence authorities indica...

Show HN: Reladraw - A diagram language where you decide where to place things

Source: Hacker News (Top 20)

I love making diagrams to help understand, plan, etc. However, the options are (A) auto-placement languages like Mermaid or Graphviz (which don't let me decide how the diagram looks), or (B) software like Draw.io which are powerful but are very time consuming (and inefficient for agents to manipulat...

Turning GLM-5.3-Flash into a Jev-like decision model

Source: *Hacker News (Top 20)*

We found an approach to get Jev-like properties from standard LLMs like GLM-5.3-Flash. The core idea is to craft the input prompt so that the first output token answers the question. This makes it possible to get a decision with a single forward pass. In the blog post, we describe the approach in de...
