[\$] LWN.net Weekly Edition for October 1, 2026

Source: *LWN.net*

Inside this week's LWN.net Weekly Edition: Front : PostgreSQL and the kernel; Rust on the GPU; KDE Plasma; C and memory safety; Rust radio; KDE funding; Chromium development. Briefs : File-notification attacks; Kernel report; TAB election; F-Droid 2.0; Firefox 157.0; GDB 18.1; Git v2.56.0; Quotes;

[\$] The year in Plasma and what's ahead

Source: *LWN.net*

A lot has happened in the KDE Plasma desktop environment in the last year. Marco Martin, a KDE contributor who spends most of his time working on Plasma, took the stage at Akademy 2026 in Graz, Austria to give an update on Plasma's major new features, some of the minor-but-interesting ones, and a pr...

Kernel Recipes videos posted

Source: *LWN.net*

The full set of videos from the recently concluded Kernel Recipes conference has been posted. Also noteworthy are the associated caricature drawings, by Frank Tizzoni, of attendees and the speakers .

Reports from the 2026 Python Language Summit

Source: *LWN.net*

The 2026 Python Language Summit was held on July 14 in Kraków, Poland; there is now a series of reports available on the topics that were discussed there. They include the memory buffer protocol, garbage collection, free-threaded Python, and "Spicycrab".

[\$] Comparing Chromium development at Google and Igalia

Source: *LWN.net*

Sharon Yang is a Chromium developer who worked at Google on the browser and now works on it at Igalia. On the final day of FOSSY 2026, she gave a presentation on her experiences with both of those companies, comparing and contrasting the ways the each operates and how that affects work on the code b...

The Linux Foundation Technical Advisory Board 2026 election approaches

Source: LWN.net

The election for members of the Linux Foundation Technical Advisory Board will be held electronically after the close of the upcoming Linux Plumbers Conference . The call for candidates is open, with a nomination deadline of October 7. There are five seats to fill this time, including the one vacate...

Security updates for Wednesday

Source: LWN.net

Security updates have been issued by AlmaLinux (389-ds:1.4, container-tools:rhel8, go-toolset:rhel8, grafana, httpd:2.4, nodejs:22, postgresql:12, and postgresql:15), Debian (libwebsockets, openssl, and pcre2), Fedora (adwaita-icon-theme, cinnamon, dconf, epiphany, flatpak-builder, gcr, gdm, gjs, gl...

Reimagining the enterprise innovation engine in the agentic era

Source: Red Hat Blog

Four years ago, I outlined a playbook for building an enterprise innovation engine. The goal was straightforward: establish a repeatable model for discovering, aligning, developing, and commercializing emerging technologies before market shifts pass you by. While those foundational phases still appl...

Migrate virtual machines with Red Hat OpenStack Services on OpenShift

Source: Red Hat Blog

IT decision makers and their teams often need a scalable private cloud to support optimizing IT operations as they adopt a foundation for cloud-native development. Red Hat OpenStack Services on OpenShift brings massive scale to Infrastructure-as-a-Service, allowing virtualized and cloud-native workl...

Building an AI-powered multimodal compliance monitor: From training to tracking to chat

Source: Red Hat Blog

Organizations face a persistent challenge maintaining workplace safety, security, asset tracking, and operational compliance across facilities with multiple video feeds. Manual monitoring is resource-intensive, inherently reactive, and often misses critical events or patterns indicating safety risks...

OpenAI Disrupts Reasoning Extraction Campaign Linked to Moonshot AI Associates

Source: *The Hacker News*

OpenAI on Wednesday said it identified and disrupted a coordinated distillation campaign that was designed to illicitly extract protected reasoning from its artificial intelligence (AI) models. A "core cluster of the activity," going back to the first week of July, has been attributed to individuals...

CISA Adds Exploited Cisco Catalyst SD-WAN Manager Auth Bypass to KEV

Source: *The Hacker News*

The U.S. Cybersecurity and Infrastructure Security Agency (CISA) on Wednesday added a critical authentication bypass flaw impacting Cisco Catalyst SD-WAN Manager to its Known Exploited Vulnerabilities (KEV), following reports of active exploitation. The vulnerability, tracked as CVE-2026-76504 (CVSS...

Google Rolls Out Gemini 4 Argon to Trusted Cyber Defenders, Plans Guardrail-Free Version

Source: *The Hacker News*

Google on Wednesday announced its latest frontier artificial intelligence (AI) model, Gemini 4 Argon, that it said is being rolled out to a set of trusted cyber defenders through its Fairwind Program. "It delivers frontier performance in complex workflows across real-world software engineering, ente...

Apple CoreGraphics PoC Emerges as WhatsApp PDF Checks Hint at Possible Delivery Path

Source: *The Hacker News*

Security researchers have published the first public proof-of-concept for CVE-2026-86950, an Apple CoreGraphics flaw Apple says may have been used in attacks against specific targeted individuals. The trigger is a malicious PDF with a crafted embedded font that crashes unpatched iPhones and Macs. Th...

Bitget Confirms Third-Party Zero-Day Behind \$387.5 Million Cryptocurrency Theft

Source: *The Hacker News*

Cryptocurrency exchange Bitget on Wednesday confirmed that attackers who stole \$387.5 million last week exploited a zero-day flaw in third-party security products,

citing ongoing investigation findings from SlowMist. "Their investigation identified malicious activity involving third-party security p...

MetaMask Security Incident Prompts Exit of Affected Ethereum Validators

Source: The Hacker News

MetaMask on Thursday said it's responding to what it described as an "ongoing security incident" impacting part of its infrastructure. "We are actively addressing and remediating the issue internally, in coordination with external partners and security advisors," the software cryptocurrency wallet m...

Citrix NetScaler Post-Exploitation Payload Creates Superuser, Maps Web Shell to CSS-Like URLs

Source: The Hacker News

Threat actors have been observed exploiting a critical pre-authentication command injection vulnerability in Citrix NetScaler ADC and NetScaler Gateway to drop web shells and attempt theft of configuration data. LevelBlue's Threat Hunt Operations & Research (THOR) team, which analyzed the exploitati...

Attackers Exploit Zimbra Flaw to Deploy Web Shells and Harvest Authentication Secrets

Source: The Hacker News

Threat actors have weaponized a now-patched security flaw in Zimbra Collaboration Suite (ZCS) to deploy web shells and access mailbox data, according to findings from the Microsoft Security Research team. The attack exploits CVE-2026-73570 (CVSS score: 8.9), an unauthenticated operating system comma...

Attackers Abuse MSP360 to Deploy ScreenConnect in Dual-RMM Phishing Attacks

Source: The Hacker News

Microsoft has warned of phishing campaigns distributing an installer for the MSP360 Remote Monitoring and Management (RMM) software under the guise of meeting invitations, PDF-themed lures, software update prompts, and other social-engineering content. "Once executed, the legitimate MSP360 installer...

Cisco Warns of Attackers Exploiting Critical Authentication Bypass in SD-WAN Manager

Source: The Hacker News

Attackers are exploiting a new critical zero-day flaw in Cisco Catalyst SD-WAN Manager, the system companies use to manage their Cisco SD-WAN networks, Cisco said in an advisory on September 30. The flaw, CVE-2026-76504, could allow a remote attacker with no login access to use the Manager's API as...

Attackers Abuse ChatGPT Custom GPTs to Deliver RAT via ClickFix Lures

Source: The Hacker News

Threat actors are abusing ChatGPT Custom GPTs to disguise them as legitimate product offerings and direct unsuspecting victims to malicious sites that employ ClickFix lures to deliver malware. Huntress, which observed the activity in late September 2026, said it marks the abuse of yet another featur...

Know Your Enemy: Browser-Based Attack Techniques in 2026

Source: The Hacker News

Given that the browser is where business apps are accessed and used, it makes sense that attacks are happening there too. Most breaches today begin in a browser session. Often, they never leave it, with the entire attack chain from initial access to exfiltration playing out in the browser. Here are...

AI Coding Agents Exposed 13,000 Internal Images, Including Billing Records, on GitHub

Source: The Hacker News

AI coding agents asked to share screenshots of code changes for review have put internal company images in public GitHub repositories, security company Glow said. Its researchers found more than 13,000 internal images from developers at over 300 organizations, including customer billing records and...

US-Focused CSuite Phishing Steals Microsoft 365 Sessions and Deploys RMM Tools for Remote Access

Source: The Hacker News

ANY.RUN researchers traced a US-focused CSuite phishing campaign across 351 sandbox analyses, with 51% of submissions coming from the United States. Technology, manufacturing, government, and consulting organizations showed the highest exposure. By combining Microsoft 365 session theft with remote-a...
