Kernel prepatch 7.3-rc2

Source: *LWN.net*

The 7.3-rc2 kernel prepatch is out for testing. Linus said: This didn't *feel* like a particularly busy rc2, but it clearly was. rc2 is usually the quietest time when people take a breather after the merge window and it takes a while to start finding bugs. But not this time - this is a "full fat" rc...

Framework Laptop 12 Arrives with Fedora Pre-installed

Source: *Fedora Magazine*

Recently, Framework announced their new Laptop 12, which optionally comes with the KDE Edition of Fedora Linux pre-installed. Framework's modular hardware has long captured the hearts of tinkerers, and many Framework users were already running Fedora Linux. Giving community members the option to unb...

Linux 7.3 Review: AI Chaos, MASSIVE Performance, GPU, CPU, and Rust Upgrades

Source: *SavvyNik*

We're exploring patches and merge requests as AI/LLMs are overwhelming maintainers. These are the patches submitted for the Linux Kernel 7.3 merge window. These include major improvements to performance, gpu, cpu, storage, memory and networking on Linux systems using the kernel. This in-depth review...

N-able Issues Fourth N-central Hotfix in Five Weeks for Unauthenticated RCE Flaw

Source: The Hacker News

Every on-premises N-central build below 2026.3.1.14 — including servers updated to Hotfix 3 a day earlier — needs Hotfix 4. N-able's incident notice says the flaw has been exploited in the wild; its release notes say that is unconfirmed. N-able has released its fourth hotfix in five weeks for the N...

JSCeal Malware Can Bypass Google Authentication Using Stolen Session Cookies

Source: The Hacker News

Cybersecurity researchers have unpacked JSCeal, a sophisticated compiled V8 JavaScript (JSC) malware with credential harvesting, surveillance, and traffic-interception capabilities. "The payloads are protected with javascript-obfuscator, using multiple techniques including RC4-protected strings, con...

Attackers Hijack MikroTik Routers Through Internet-Exposed SSH Without Authentication

Source: The Hacker News

Attackers are exploiting MikroTik routers with their Secure Shell (SSH) remote-access service, which is reachable from the internet, to gain full administrative control without authentication, according to CERT Polska's attack warning, published on September 5. Successful attacks date to at least Se...

Four REVSTEALER-Linked Modules Disable Windows Update and Defender to Run a Crypto Miner

Source: The Hacker News

Elastic Security Labs has documented four previously unreported programs associated with REVSTEALER, an emerging Windows information stealer, that remain on an infected machine after the stealer deletes itself. One of them switches off Windows Update and Microsoft Defender before running a cryptocur...
