[$] The 2026 Maintainers Summit

Source: LWN.net

> The Maintainers Summit is a one-day, invitation-only gathering of about 30 kernel developers; it is held once each year to discuss policy-related issues that are not always amenable to resolution via email. The 2026 event was scheduled for October 8 in Prague, Czechia. Unsurprisingly, the discussion...

LineageOS 24 released

Source: LWN.net

> The LineageOS project, which produces an Android-based distribution for mobile devices, has announced the release of LineageOS 24.0. We're a bit sentimental about this release, as it precedes a really fun upcoming milestone. On December 24, 2026, LineageOS will celebrate 10 years. It's a remarkable...

Security updates for Monday

Source: LWN.net

> Security updates have been issued by AlmaLinux (cjose, compat-openssl10, compat-openssl11, curl, dogtag-pki, dovecot, emacs, glibc, kernel, openssl, python3.12, python3.14, and sssd), Debian (chromium, ghostscript, tor, and vips), Fedora (kernel, libical, markdownlint-cli2, openbao, openvpn, php-get...

Developer-first innovation: Reducing technical debt with Red Hat Enterprise Linux

Source: Red Hat Blog

> Managing software teams means balancing 2 conflicting priorities: developers want freedom to pick their tools, while leadership needs security and stability. When every team runs a different operating system (OS) distribution, developers end up spending valuable sprint hours managing infrastructure...

Chaos engineering in practice: Lessons from enterprise customers

Source: Red Hat Blog

> Working with enterprise customers on chaos engineering has reinforced 1 lesson: Resilience is a business requirement. Failed transactions interrupt revenue,

> infrastructure outages affect multiple workloads, and database failures put critical data at risk. Most importantly, repeated failures erode cu...

LG Smart TVs Vulnerable to Pre-Auth Root Takeover From Local Network

Source: The Hacker News

> Three vulnerabilities in LG's webOS can be chained to give an attacker on the same local network root access to certain smart TVs without a PIN or any interaction from the owner. LG has issued a fix, according to an advisory published by SSD Secure Disclosure on October 12. The chain was tested on t...

Product Walkthrough: Bitdefender AI Visibility and Control

Source: The Hacker News

> A user opens a browser tab, pastes data into a chat assistant, and nothing is installed. A developer adds a coding assistant as an editor extension, and nothing shows up in the installed programs list. Someone downloads a local model runtime, a program that runs models directly on the machine instea...

Attackers Heat French Supermarket Fridges Up to 50°C by Hijacking Danfoss Controllers

Source: The Hacker News

> Attackers took remote control of fridges and freezers at hundreds of French supermarkets on the night of October 11 and warmed them, forcing stores to throw food away, several retail chains said. The attackers reached them through the controller that runs all of a store's fridges and freezers, a dev...

Two Critical MarkLogic Flaws Could Give Delegated Managers Persistent Admin Control

Source: The Hacker News

> Two of 31 newly disclosed flaws in Progress Software's MarkLogic Server database could let an account given only some management privileges take administrator control of the server, the company says. Progress published all 31 on October 12 and scored five of them critical. Fixes have been available...

GitLab Patches CVSS 10.0 Flaw That Could Let Unauthenticated Users Run Server Code

Source: The Hacker News

> GitLab has released patches for a maximum-severity security flaw impacting its Community Edition (CE) and Enterprise Edition (EE) software that could result in arbitrary code execution. "GitLab has remediated an issue that, under certain conditions, could have allowed an unauthenticated user to exec...

Low-Cost Android Phones Ship With Preinstalled Malware That Turns Them Into Residential Proxies

Source: The Hacker News

> Low-cost Android smartphones have been shipped with malicious software baked into the device firmware, allowing bad actors to covertly install apps, conduct ad fraud, and turn devices into residential proxies. The activity, which targets Android devices built on MediaTek platforms across several bra...

Weekly Recap: Helpdesk 0-Days, Rogue Certs, ShinyHunters Arrest, AI-Fooling Malware and More

Source: The Hacker News

> Some meetings last longer than it took attackers to jump on a newly disclosed security flaw this week. Within hours, they were already testing it. That's not much time to read the warning, let alone do something about it. But speed is only part of the problem. A secure connection didn't always mean...
