Critical security vulnerability affects OpenSSH on Alpine Linux systems

Source: LWN.net

> Version 10.6p2 of OpenSSH has been released with a workaround for a critical vulnerability that affects Linux systems that use musl libc with PAM disabled, such as Alpine Linux . OpenSSH developer Damien Miller said : If you operate a Linux system that uses musl libc without PAM (Alpine Linux is one...

[$] LWN.net Weekly Edition for November 5, 2026

Source: LWN.net

> Inside this week's LWN.net Weekly Edition: Front : Kernel cells; Debian LLM reviews; glibc system-call wrappers; Binder in Rust; Kernel CVE flood; Fedora KDE and X11 removal; 7.4 merge window part two; Portable Python. Briefs : MTCP RCE; Bash security; XCPE botnet; Bazzite 45; Fedora 45; openSUSE Le...

[$] Plasma X11 session removal surprises some Fedora users

Source: LWN.net

> The KDE Project announced, in 2025, that Plasma 6.7 would be the last version of the desktop environment that would support X11 sessions. Those who keep up with KDE's announcements no doubt expected it when Plasma 6.8 dropped X11 support as promised. What seems to have come as a surprise, at least t...

Bazzite 45 released

Source: LWN.net

> Version 45 of Bazzite , the image-based gaming distribution based on Fedora Linux, has been released. Notable changes in this release include a rebase to Fedora 45, updated Open Gaming Collective (OGC) kernels, support for Logitech TrueWheel devices, and more. LWN covered Bazzite in December 2025.

[$] Portable Python scripts with dependencies

Source: LWN.net

> A basic Python script is portable: it can be copied between machines with little concern about compatibility. A script that depends on third-party packages

> requires quite a bit more care and consideration, however. In 2023, PEP 723 ("Inline script metadata") introduced a standard for declaring a Pyt...

Security updates for Wednesday

Source: LWN.net

> Security updates have been issued by AlmaLinux (cockpit, dpdk, fence-agents, firefox, freerdp, gimp, opentelemetry-collector, python-dns, qemu-kvm, and raptor2), Debian (apt and squid), Fedora (ags, apptainer, chromium, fractal, mingw-harfbuzz, mingw-qt5-qtwebkit, mingw-qt6-qt5compat, python-mistune...

Why Lightwell pairs dependency backports with upstream collaboration

Source: Red Hat Blog

> Enterprise applications rarely break because of custom business logic; instead, the issue is often related to changes in underlying open source dependencies. When a high-severity vulnerability is found in a third-party library, organizations face a difficult trade-off—rush a major version upgrade an...

Red Hat OpenShift is now generally available in Google Cloud’s sovereign regions

Source: Red Hat Blog

> Data residency rules and sovereignty mandates often determine where a workload is allowed to run. To meet those requirements and keep the platform your teams know and trust, Red Hat is expanding its commitment to digital sovereignty. Red Hat OpenShift Container Platform 4.22.16 and ensuing versions...

Linus Torvalds talks about AI in Linux and his Reversal

Source: SavvyNik

> Linus Torvalds Speaks on AI and how it affects the Linux kernel development and open source. We also hear how he's using it and how he encourages others. AI has uncovered recent security bugs that were release before the fix.. We'll listen to the Creator of Linux. My Linux Bundle is here: https://...

OpenAI AI Pipeline Generates 948 Linux Root Escalation Exploits in 30-Hour Run

Source: The Hacker News

> OpenAI on Wednesday detailed a pipeline that employed an upcoming cyber-focused artificial intelligence (AI) model to validate and patch 948 local privilege escalation vulnerabilities in Linux for $1.2 million in API costs. "Our prototype identified and analyzed 2,308 candidate Linux kernel findings...

5 Active Cyber Threats That Put US Enterprises at Risk in October 2026

Source: The Hacker News

> October 2026 brought another wave of cyber threats targeting US businesses, with attackers exploiting trusted platforms, legitimate authentication processes, and everyday business workflows. For enterprises, these campaigns raise the stakes beyond individual security incidents, increasing the risk o...

Apple to Start Scanning Publicly Shared iCloud Photos and Files for Harmful Content

Source: The Hacker News

> Apple has revealed that it plans to start checking public iCloud links for harmful content starting with iOS 27.3, iPadOS 27.3, macOS 27.3, and visionOS 27.3. The change specifically applies to scenarios where users share iCloud content, such as photos in iCloud Photos or files in iCloud Drive, by s...

CERT-In Flags AI-Driven Attacks as Backdoored ARTEX Exposes 62 Consoles to Root Access

Source: The Hacker News

> The Indian Computer Emergency Response Team (CERT-In) has disclosed that an artificial intelligence (AI)-assisted threat actor it tracks as Crafty Falcon is targeting organizations in the Banking, Financial Services, and Insurance (BFSI) sectors in the country. Describing the threat as active and on...

Zyxel GS1900 Patch Fails to Block Zero-Day Exploit Allowing Root Command Execution

Source: The Hacker News

> Zyxel GS1900 network switches that received the vendor's earlier fix for an actively exploited flaw are still open to the exploit attackers used, researchers at Binarly found. The exploit lets anyone who can reach a switch's web management interface run commands on it without logging in. Zyxel has r...

Hackers Exploit Patched Apple Flaw to Deliver Info-Stealing Malware, CISA Says

Source: The Hacker News

> The U.S. Cybersecurity and Infrastructure Security Agency (CISA) on Wednesday added a medium-severity security flaw impacting multiple Apple operating systems to its Known Exploited Vulnerabilities (KEV) catalog, following reports of active exploitation. The vulnerability in question is CVE-2024-278...

Debian and Ubuntu APT Flaw Lets MitM Attackers Swap Verified Packages and Run Code as Root

Source: The Hacker News

> A flaw in APT, the package manager for Debian and Ubuntu, allows an attacker who can modify package downloads to swap a checked package for their own. The attacker's code then runs as root, according to advisories that Debian, Ubuntu, and APT's developers published on November 4. The attack needs AP...

SonicWall Won't Patch EoL GMS Flaws That Could Expose Files, Alter Database Records

Source: The Hacker News

> SonicWall has warned of two vulnerabilities impacting end-of-life Global Management System (GMS) systems that it said will not be patched. Details of the security flaws, which affect SonicWall GMS 9.5.2 and earlier versions, are below - CVE-2026-109593 (CVSS score: 9.1) - An unauthenticated file rea...

Researchers Uncover Prompt Adware Hidden in OpenAI Codex Jailbreak Toolkit

Source: The Hacker News

> Cybersecurity researchers have disclosed details of an OpenAI Codex jailbreak bundle that's designed to modify an artificial intelligence (AI) agent's trusted instructions to insert advertisements for a third-party AI gateway. The phenomenon has been codenamed prompt adware by Check Point Research....

APT29-Linked Hackers Hijack Web Analytics Script to Deliver iOS and Android Exploits

Source: The Hacker News

> The Russia-linked threat actor known as APT29 is presumed to be behind a large-scale watering hole campaign targeting iOS and Android users through compromised websites, fake domains, and a supply chain attack involving a Ukrainian web analytics service called Plerdy SEO Tracker. "The injected JavaS...
