Linux

Rust 1.100.0 released

Source: LWN.net

> Version 1.100.0 of the Rust language has been released. Notable changes include the stabilization of the never type , core parts of the Allocator API, reporting of unused dependencies in Cargo, and more.

Glasswing overwhelms maintainers with underwhelming findings (VulnCheck)

Source: LWN.net

> Patrick Garrity of VulnCheck has written a blog post that looks at vulnerabilities found by Anthropic's Project Glasswing since it launched on April 7, and finds it wanting: Of the 37,966 findings Anthropic reports, only 7,349 (19.4%) have been made public. Just 217 of those have been marked fixed....

Introducing Polo: a Wayland MATE compositor

Source: LWN.net

> Kerem Söke has announced the 1.0 release of Polo , a Wayland compositor for the MATE Desktop Environment : The idea is to keep MATE behaving as closely as possible to how it does on X11, rather than changing the desktop to fit a different compositor. [...] Window management, metacity, workspaces, ti...

[$] C++26 contract confusion

Source: LWN.net

> The International Organization for Standardization (ISO) has blessed seven C++ language revisions since 1998. The language is mostly developed by ISO's Working Group 21 , which considers proposed additions and amendments, integrates them into a document, and then presents that document to the main I...

Stenberg: 30 years of Internet transfers with curl

Source: LWN.net

> Daniel Stenberg reflects on the 30th anniversary of the curl project. libcurl runs in an estimated thirty billion installations today. It is a rough estimate since the

> majority of all libcurl users never tell us they use it, but we need to find it mentioned in their credit screens, open source licen...

Security updates for Thursday

Source: LWN.net

> Security updates have been issued by Debian (aodh, apache2, dnspython, firefox-esr, mutt, octavia, spip, thunderbird, and watcher), Fedora (epiphany, firefox, freerdp, java-25-openjdk, java-latest-openjdk, libsoup3, perl-HTTP-Parser-XS, perl-libnet, php-getid3, pipx, python-crate-ingredients, python...

Installing the official Claude Desktop Linux beta on Fedora Linux

Source: Fedora Magazine

> Anthropic ships its Claude Desktop beta for Linux only as a .deb. This article shows how to install that same package on Fedora with a small MIT-licensed script that verifies it first, installs it without root, and removes it cleanly.

Friday Five — November 13, 2026 | Red Hat

Source: Red Hat Blog

> Catch up on Red Hat's news at KubeConRed Hat’s KubeCon + CloudNativeCon North America 2026 Book of News gathers product announcements, partnerships, and open source milestones in one place—covering AI in production, Red Hat OpenShift 5, RHEL security updates, KubeVirt graduation, and Lightwell remed...

Introducing Red Hat Advanced Cluster Security for Kubernetes 5: Bring Red Hat Enterprise Linux virtual machines into vulnerability management

Source: Red Hat Blog

> Your virtual machines (VM) run applications the business depends on. Managing vulnerabilities in those workloads remains essential as you bring them onto Red Hat OpenShift. Red Hat Advanced Cluster Security for Kubernetes 5 introduces vulnerability management for Red Hat Enterprise Linux (RHEL) VMs...

What's new in Red Hat OpenShift Lightspeed 2

Source: Red Hat Blog

> Red Hat OpenShift Lightspeed started as a simple chat assistant, right there in the Red Hat OpenShift console. All you had to do was ask it a question, something like, "How do I expose my application with a route?" It would give you an answer, referencing the right page from the documentation, speci...

The real value of a Red Hat OpenShift subscription: 1 supported platform vs. managing 50 open source projects

Source: Red Hat Blog

> Red Hat OpenShift is built on open source software. In fact, it’s composed of more than 50 different projects. You could download and install every one of those individual components directly and run them. Yet thousands of enterprises—including 58% of the top 50 companies in the Global Fortune 500—h...

Microsoft Teaches Linux "Lessons", Red Hat CVSS 9.6, & Zoom Hack Not Great..

Source: SavvyNik

> This week in cybersec & ai news has been wild and massive.. with NEW hacks and vulnerabilities in Zoom, Linux, and Red Hat. It feels like nothing is safe.. but hey they're going for enterprise first. My Linux Bundle is here: https://savvynik.com Think your Ready for Linux? Take my quiz: https://re...

A Race Condition broke Linux Security

Source: SavvyNik

> A small race condition really affected the Kernel this week.

When an AI Agent Goes Wrong, Can You Stop It?

Source: The Hacker News

> Suppose an AI agent is asked to sort support tickets and look up account details. A ticket contains instructions that lead the agent to export records to an unfamiliar destination. The agent can make the request because its identity has access to the records and its connected tools allow the action....

SilentAir Hijacks Asian Telecom Networks to Intercept SMS 2FA Codes and Spy on Taiwanese Users

Source: The Hacker News

> A newly identified spying group used hacked equipment inside Asian mobile operators to intercept the calls and texts of selected people, mostly in Taiwan. Enea, a telecom and cybersecurity software company based in Stockholm, found the group's attack sources in at least six Asian countries and named...

Operation Endgame Takes Down Gootloader, CastleRAT and StealC Servers, Seizes 6.4M Stolen Logins

Source: The Hacker News

> An international police operation took down servers behind Gootloader, CastleRAT and StealC this week. Criminals used the three malware tools to gain access to computers, steal passwords, and launch ransomware attacks. Police also seized about 6.4 million stolen logins belonging to more than 40,000...

Hackers Exploit PHP2Shell Flaws in Check Point Gateways to Deploy TSGA Backdoor and Wipe ESXi Files

Source: The Hacker News

> An unknown threat actor has been observed targeting unpatched Check Point Security Gateways to obtain initial access via the PHP2Shell vulnerabilities and then a previously unreported local privilege escalation flaw in Gaia OS to deploy a backdoor called TSGA. The activity, detailed by Check Point,...

Hackers Exploit N-central Flaws to Infect 21 Servers, Including 19 Running Hotfix 2

Source: The Hacker News

> N-able on Thursday said it's taking additional precautions in the wake of public disclosure of a new set of flaws tracked as 4EverAble2Shell and Agent2Shell. "We are restricting certain N-central features and integrations," the company said in a Thursday update. "These measures may affect some funct...

ThreatsDay: 59 Linux Kernel Bugs, Falcon Spyware, GSocket Backdoors + 17 More Stories

Source: The Hacker News

> A search result isn't always safe. An access request isn't always harmless. And a familiar account doesn't always mean a familiar person is using it. Simple things to remember. Yet a surprising amount of this week's trouble starts right there. Attackers are using fake websites, stolen access, and tr...

New SignDrop Zero-Day Exploit Turns Windows CLFS Security Feature Into SYSTEM Access

Source: The Hacker News

> Public exploit code released earlier this week claims that a local Windows user can gain SYSTEM privileges through the Common Log File System driver. The proof of concept, called SignDrop, targets a log-authentication feature added to the driver last year. It abuses how clfs.sys creates companion fi...

Critical Red Hat Quay Flaw Lets Attackers Read and Overwrite All Private Container Images in a Registry

Source: The Hacker News

> A critical flaw in Red Hat Quay allows an attacker who can access a Quay registry to read and overwrite private container images in every repository. Quay enables anonymous access by default, and while it is enabled, the attacker needs no account. When it is off, anyone with a valid account can stil...

Citrix Patches 12 NetScaler and Secure Access Client Flaws, Including Authentication Bypass

Source: The Hacker News

> Citrix has released patches for multiple critical security flaws impacting NetScaler ADC, Citrix NetScaler Gateway, and NetScaler Console that could lead to denial-of-service (DoS) or an authentication bypass. The critical vulnerabilities that impact NetScaler ADC and NetScaler Gateway are listed be...

186 Fake AI Domains Redirect Users to ClickFix Lures, Browser Malware, and Search Hijackers

Source: The Hacker News

> Cybersecurity researchers have found that lookalike domains masquerading as artificial intelligence (AI) tools are being used to serve ClickFix-style lures, browser-hijacking malware, and a set of extensions that hijack user searches. This delivery pattern has been codenamed TypoPrompting by Island....

SCKit Malware Turns ScreenConnect Support Sessions Into Potential MSP Attack Paths

Source: The Hacker News

> The ongoing campaign targeting ConnectWise ScreenConnect deployments involves the exploitation of a now-patched critical security flaw in the remote access software, and not a new vulnerability, it has emerged. Blackpoint Cyber's Adversary Pursuit Group (APG), which shared the details with The Hacke...
