Claude Opus 5 Helped Researchers Take Over OpenAI Staff Accounts via Chained Flaws

Source: *The Hacker News*

Three researchers at the security firm Hacktron used Anthropic's Claude Opus 5 to chain two flaws and take over the ChatGPT and Codex accounts of several OpenAI employees, then reach an internal OpenAI code repository. The chain began with a bug in the software that runs OpenAI's public help forum a...

Identity Visibility in 2026: The Foundation of Identity Security

Source: *The Hacker News*

Identity visibility is a starting point for modern identity security, because stolen and misused credentials are among the most frequently reported initial access vectors in breach research, including Verizon's annual Data Breach Investigations Report. This article explains what identity visibility...

SolarWinds Patches ARM Hard-Coded Key Flaw Enabling Unauthenticated RCE

Source: *The Hacker News*

SolarWinds has released security updates to address a high-severity flaw in Access Rights Manager (ARM) that, if successfully exploited, could lead to an unauthenticated remote code execution vulnerability. The vulnerability, tracked as CVE-2026-28326, is rated 8.8 out of 10.0 on the CVSS scoring sy...
