uCreator Android Spyware Can Steal Telegram 2FA Passwords and Clone WeChat Accounts

Source: The Hacker News

> A rentable Android spyware kit called uCreator takes over Telegram and WeChat accounts by hiding its code inside working copies of the two apps, researcher Ovi found. It only reaches people who install one of these tampered copies, spread outside the official app stores, or who run WeChat inside the...

Microsoft 365 Token-Replay Attacks Compromise 97 Accounts at 79 Organizations

Source: The Hacker News

> Cybersecurity researchers have disclosed a Microsoft 365 campaign that has been observed leveraging an adversary-in-the-middle (AitM) relay to capture sign-in sessions and then replay the stolen tokens to break into email accounts at 79 organizations. Huntress, which observed the activity between Ju...

Gheist Uses Stolen GitHub Tokens to Steal Private Repository Secrets via Actions Logs

Source: The Hacker News

> An automated campaign is using stolen GitHub tokens to plant workflows that print a repository's secrets into its GitHub Actions logs, which the attackers then download before deleting the runs. The attacks have succeeded in private repositories and GitHub Enterprise environments, according to an an...

Malicious File in Downloads Folder Tries to Trick AI Coding Agent Into Installing Malware

Source: The Hacker News

> A malicious instruction file sitting in a developer's Downloads folder tried to make their AI coding agent install a known-malicious npm package, security firm Forever Security said in a report published last week. The company caught the attempt on a real customer's machine and stopped the agent bef...

Unpatched Tailscale SSH Flaws Could Let a Hacked Device Reach Root on Other Servers

Source: The Hacker News

> A single hacked device on a Tailscale network can be used to gain root access to other servers it can reach, according to a security researcher who published the findings this week. The attack requires two things: Tailscale SSH set up to allow port forwarding, and an attacker who already controls on...

PHP2Shell Exploitation Attempts Continue Amid Suspected N. Korea Global Scanning Activity

Source: The Hacker News

> In an update, Palo Alto Networks Unit 42 said it's retracting its earlier assessment that the post-compromise activity targeting the European government agency involved the exploitation of the PHP2Shell flaws. "What researchers saw was an attack against a European government agency executed in the c...
